TO START COMMUNISM PROBE AT O. S. U.

12 PROFESSORS ARE CITED TO APPEAR BEFORE BOARD

Chief of Police French Gives Student Body Clean Bill of Health as to Liquor Charge—Sensationalists Who Like to See Their Names in Public Print Are Authors and Instigators of Investigation—Indications are That It Will Fall Flat.

All professors and instructors of Ohio State university who have been mentioned during the investigation by a special committee of the board of trustees into alleged communistic activities in the institution are to be called by the committee for an inquisition.

Announcement of the course was made Monday night following a day of review of moral conditions among the student body and of inquiry into the foundation of charges of communistic teachings by the nominal author of the resolution for the proposed investigation by the Ohio general assembly, Senator James R. Hopley, Crawford county, and the actual author, Dr. Clarence E. Maris, Columbus.

The next question to be taken up by the committee is the views of students concerning drinking of intoxicating liquor by classmen with members of the student group as witnesses.

The Columbus police force gave to the men who are acquiring knowledge at Ohio State a clean bill of health, adding that conditions constantly are becoming better and that there is less and less violation of law among them.

Students, it is anticipated, are expected to admit there is a measure of violation which the responsible campus eliminate. Since Governor A. W. Donahey demanded an investigation after the arrest of Charles Dabney Horton, instructor, the students have conducted their own research. They have found that drinking is at a minimum, but that further improvement is possible. Columbus police said conditions or moral scores are nearly ideal.

The latitude to be taken by the committee in its inquiry into personal and private political views and activities of individual members of the faculty has not been divulged by the body which is working with George W. Rightmire, acting president. It has been intimated that these investigations may take a wide scope, and not merely be limited to classroom views and theories. Professors who have been listed as members of "Red" organizations are eager to obtain vindication.

Among those named are Professors George L. Alps and J. A. Leighton, nationally known leader in their fields in the university. Others less widely known are Francis W. Coker, Homer C. Hackett, O. A. Norman, Milton Percival, Carl Wittke, E. S. Ingraham, Albert B. Weiss, Carl C. North, E. A. Culler, G. H. McKnight and H. R. Spencer.

Dr. Maris occupied hours in expounding his notions of the teaching staff, declaring that as a political writer he had assailed the university for years because of the communistic theories that went forth from the institution and that he was happy in the opportunity to vindicate himself.

Dr. Maris spoke slowly and at times wandered far afield, but ascribed his halting speech to feeble health. The committee gave him opportunity to nurse his own methods in developing his ideas.

Briefly he assailed the institution because professors and instructors were members of organizations like the committee of 48 which supplied the nucleus of the independent movement in behalf of the late Senator Robert M. LaFollette for president in

1924. He said such organizations gave encouragement to "Red," Communist, Socialist, Bolshevik and Fabian societies, placing all of them on a parity.

Senator Hopley said he had no personal knowledge of communism among faculty members. His information was obtained from Maris, who in turn said he received his information from newspapers.

Senator Hopley denied that he ever had heard professors or instructors discuss communism or violent overthrow of the government. Parents of students told him, he said, that subversive doctrines were taught in the university, but he declined to give names unless consent of the parents was obtained.

SOME RECORD HAS NOT LOST DAY IN YEARS

January 20, will be a red letter day in the life history of J. H. Drum, agent of the Scioto Valley Traction company.

Mr. Drum will have served five years as station agent for the company and in that time has not lost one day's time. He does not observe the unionized time of eight hours, but works twelve hours and forty minutes each week day and ten hours and forty minutes on Sundays. This is refreshing when you stop to think that in these modern working days, a fellow thinks he has accomplished a lot when he works on an eight hour shift.

D. F. HOLTMAN

Dudley F. Holtman of Chicago, recently appointed by Secretary of Commerce Hoover as assistant director of the national committee on wood utilization. Mr. Holtman has developed a number of important services to make it easier for the lumber consumer to understand the physical and mechanical properties and characteristics of different species of wood, and to get lumber which is suited to his needs.

THE SICK.

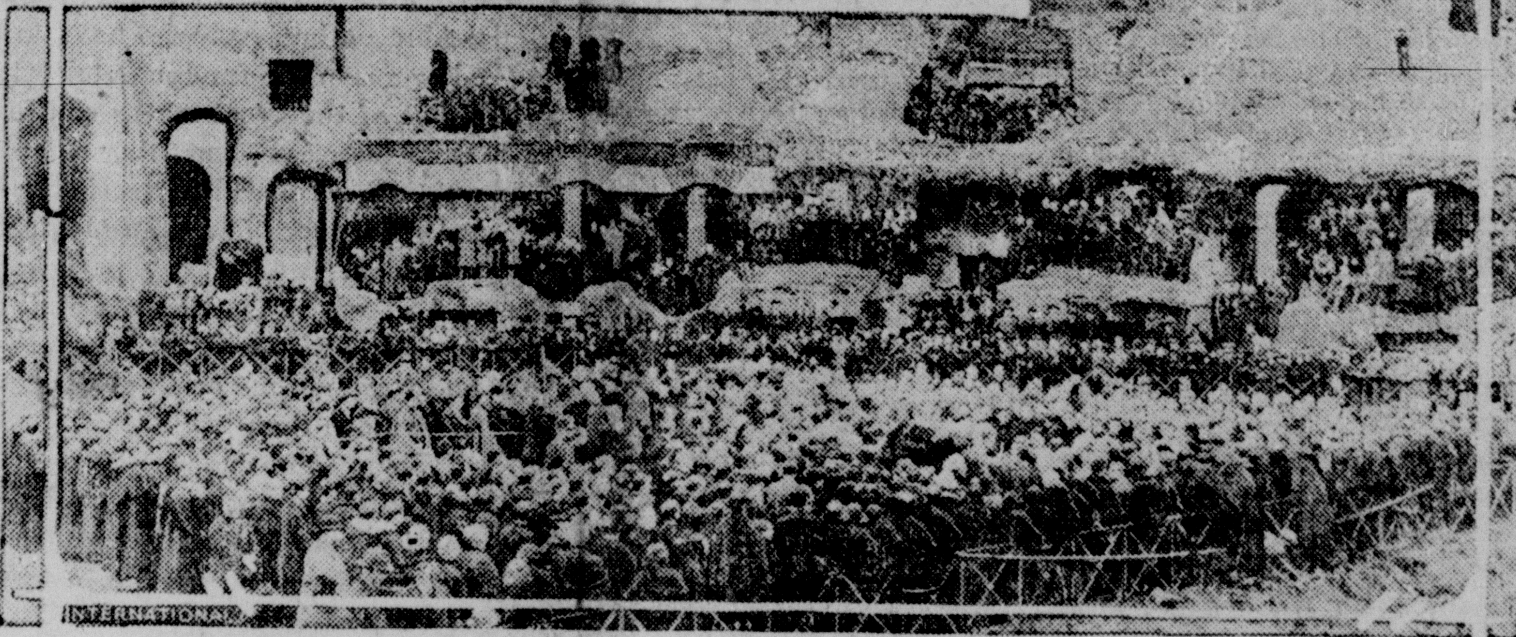

Mrs. A. M. Hope, of Columbus, who has had charge of the case of Miss Laura Mader, took ill this morning and returned home. Miss Mader is getting along nicely since her accident.

HOME FROM HOSPITAL.

Mrs. E. L. Tolbert returned home Monday from Mt. Carmel hospital, Columbus, where she underwent an operation three weeks ago. Mrs. Tolbert is making a nice recovery.

Christian Cross Replaced in the Coliseum

Here is pictured a general view of the ceremonies in the ruins of the old Roman coliseum marking the dedication of the cross by the church on the spot where the early Christians died. Centuries ago the first cross was placed there but when the popes lost the temporal power it was removed. Now it has been replaced by Premier Mussolini in deference to the wishes of Pope Pius.

HAPPENINGS IN OUR STATE

Taken Direct From Wires By Correspondents of the United States Press Association.

Sandusky—Mrs. Mary Keller, 47, today began her fight to escape the electric chair as the slayer of her 7 year old daughter, Fay Elizabeth, whom she told police she gave poison to save her from a life of poverty. The grind of obtaining a jury started this morning before Judge W. L. Fissinger, in common pleas court.

County Prosecutor Moyer scouts the "mercy murder" theory that Attorney James F. Flynn, voluntary defender of the mother expects will clear Mrs. Keller. Assisted by City Solicitor Savord, prosecutor Moyer plans to demand the death penalty. It is expected that two days will be consumed in obtaining a jury.

Gallipolis—Miss Bertha Gray, 20, of Wellston, died here today from injuries received in a coasting accident several days ago at Wellston.

Columbus—Logan Wilson, 37, was exonerated of the death of Mrs. Elizabeth Mulligan, 48, who was run down and killed by Wilson's automobile on Monday night as she stepped from a curbing.

Wilson said Mrs. Mulligan stepped into the path of his machine. He was traveling fifteen miles an hour, he said. Her neck was broken and her skull was fractured. Mrs. Mulligan was the wife of a railroad conductor.

Pomeroy—Echoes of the alleged sabotage which resulted in the destruction by fire and dynamite of coal tipples in this section last summer were heard today when Common Pleas Judge Miller sentenced Jesse Muncy, a miner, to 15 years in the state penitentiary.

Muncy was accused of stealing dynamite from a powder house. Three other miners were arrested with him and warrants were issued for others. It was charged the explosive was used in destroying the tipples.

Lorain—More than \$3,000 in loot taken by Lorain's phantom bandit in forty robberies during the last two months was returned Monday.

The loot, consisting of money and jewels, had been placed in a box and left on the steps of a school. The box was found by two boys and turned over to police.

The return of the stolen articles was not due to conscience, however, because the burglar entered four more residences Monday night. In only one the home of a minister, was anything taken.

KINGSTON FAIR FARMERS MEET IN THIS MONTH

Sessions Will be Held in the High School Auditorium January, 28 and 29.

Plans are nearing completion for the Community Fair and Farmers meet at the Kingston high school auditorium on January 28-29. The officers and committees are as follows: President, W. K. Orr; secretary, Floyd Hickie; lady correspondent, Mrs. D. H. Driesbach; treasurer, Frank Sharp; committee on resolutions are M. A. Shapard, Rev. W. S. Fisher and Frank Sharp, nominating, F. P. Long Ed Spence and A. D. Ellis.

Exhibit, Mr. Ed Umstead, Wilbur Metcalf and F. I. Rittenour; publicity Miss Margaret Thomas, Mrs. D. H. Driesbach, Mr. Paul Johnson, Mr. W. R. Sunderland; decorating, Miss Alspach and Gerald Patrick; dinner, Smith Hughes, home economics, pupils. The merchants have already boosted the "Meet" by offering a number of valuable premiums.

On January 20, there will be one day "Free Tractor School," given by Warner and Dreisbach, at their store room on West Pickaway street. Free school, free dinner and also a free picture show at the high-school theater in the evening.

PERSONALS

Mr. and Mrs. W. B. Frederick were business visitors in Columbus today. Miss Katharine Foley spent the day in Columbus.

Mrs. S. E. Evans, Mrs. Leon VanVleet and Miss Ruth Grubbs spent the day in Columbus.

Mrs. William Chadwick went to Akron today to visit her daughter, Mrs. W. J. Manley.

Mr. and Mrs. W. F. Armstrong, of Salt Creek township, left today for Cridersville called there by the illness of his sister, Susanne Wolf.

S. C. Grant went to Columbus today to attend a meeting of the Ohio Builders' association, which is in session at the Deshler.

DEATH OF MRS. DONER.

Mrs. Sarah Doner, a former resident of Ashville, died at the home of her son, Elmer Doner, near St. Paul Monday afternoon. Th deceased was 82 years of age.

The funeral services will be held at St. Paul's church Wednesday afternoon at 1:30 o'clock. Interment in Reber Hill cemetery.

SEVENTEEN SMALLPOX CASES HERE

The city has now seventeen cases of smallpox. Two of these are very light mere eruptions of the skin, that sometimes follow vaccination. All cases are quarantined and cards are posted.

The new cases are John, Ruth and Katharine Sabine, of East High street; May Arledge, aged 36, of Maplewood avenue; Helen Cupp, aged 8, of Abernethy avenue; Mary Alice Strawser, aged 8, of East Mound street and Eugene, and Virginia Arledge of 317 East Main street.

Health Officer Schneider says the authorities have the situation well in hand and every case is watched closely and the quarantine barrier has not been broken by any of the small-pox victims.

ELBA DREW

Kind deeds performed 18 years ago have brought an estate estimated at more than \$10,000 to Elba Drew, thirty-five-year-old laborer of Kansas City, Mo. Drew, when a boy, took care of F. E. Forester of Goldfield, Nev., when the latter suffering from rheumatism, went to Excelsior Springs, a health resort near Kansas City, for treatment. Forester then was in meager circumstances.

THIRD DEATH

Cincinnati—A third death was added today to the toll taken in a smash-up here Monday night when an automobile skidded and plunged over a 10 foot embankment here.

William Hardin, 23, one of those seriously injured died. A fourth victim was expected to die.

Bud Ellis 22, and Burl Richards, 23 were killed instantly when the vehicle made the wild plunge.

SALEM UNION MEETING WITH MRS. HINTON

Miss Mary Porter Gave a Splendid Account of Convention in Detroit.

The regular monthly meeting of the Salem Woman's Christian Temperance Union was held Thursday afternoon, January 14, at the home of Mrs. Ed. Hinton. There was a good attendance and much interest manifested.

The meeting was opened by singing "America, the Beautiful" and responsive reading followed by prayer by Mrs. Anna Rice. The president, Miss Mary Harpster, had charge of the program arranged by Mrs. Viola D. Romans, state vice president to celebrate the memorable day, January 16, when national constitutional prohibition went into effect.

Following a business session the county vice president, Miss Mary Porter, delegate to the national W. C. T. U. convention in Detroit, gave a lengthy and very interesting report of the convention which was enjoyed by all. At the conclusion Miss Porter was given a rising vote of thanks for her excellent report.

The county president, Mrs. Lucy B. Price, was also present and gave a valuable and instructive talk on the plan of work for this year. The program closed with prayer by Mrs. Fisher.

A delightful social period followed during which the hostess served delicious refreshments.

The February meeting will be held at the home of Mrs. Nell Evans on West Pickaway street in Kingston, topic, "Frances E. Willard—Our Great Leader."

NEWS ABOUT COURT HOUSE

General Happenings Taken From the Records of the Various County Offices.

Will of W. T. Bell.

The will of the late William T. Bell has been probated.

The testator leaves all his household goods to his daughter, Mrs. Jennie S. Robinson. His other property is bequeathed to the following named persons: Joseph F. Bell, \$25; J. M. Bell, \$1,300; Anna F. Wilbur, \$1,300; N. H. Bell, \$1,300; Jennie S. Robinson, \$1,300; a gold watch was bequeathed to his grandson, Joseph Bell.

The Presbyterian church of this city, is given the sum of \$850, to be placed in the benevolent fund of the church.

The testator also gives the trustees of Forest cemetery the sum of \$150 for the care of the Bell lot and also the lot of Taylor Millar.

His sons, Joseph M. Bell and Ned H. Bell were named and appointed executors. The estate is estimated to be worth \$8,500.

The appraisers of the estate are H. B. Weaver, George F. Grand-Girard and Milt Morris. The will is dated August 20, 1920, and was witnessed by Milt Morris and H. B. Weaver.

Appointed Administrator.

Ernest C. Bartley has been appointed administrator of the estate of Elizabeth Bartley, deceased. The estate is estimated to be worth \$400. I. F. Snyder represents the administrator.

BEAUTY SHOPPE

Miss Margaret Davis, the Beauty Shoppe operator of the Crist Department store, has returned from a visit in Springfield.

EX-POLICE COMMISSIONER DUNDON DEAD

Columbus, Jan. 18.—Thomas J. Dundon, 71, retired lumberman, died yesterday at his home, 38 South Champion Ave., following three weeks' illness.

Mr. Dundon was born April 15, 1854, in Limerick County, Ireland, and was brought to Columbus by his parents. He received his education in the Columbus parochial schools, and from 1882 until 1886 served as police commissioner. In this capacity Mr. Dundon installed the present police and fire box system.

He was a member of St. Patrick's Church, where funeral services will be held at 9 a. m. Wednesday, with solemn requiem mass.

Many of Them, Brother

It's hard to gather a woman's meaning from her words, but nature has saved a few of them the trouble of making themselves plain.—Exchange.

Feed Mash to Balance Up the Scratch Feeds

Correct practice in feeding is the greatest factor that makes for success in the poultry business. One important practice that does not have so many followers as it deserves is the feeding of mash to balance up the scratch feeds which are usually grown at home.

Those who feed a mash in winter often quit feeding it as soon as the snow drifts melt away, for they think that when the hen can get out of doors she should be made to rustle for her living. It is a mistake to do away with the mash entirely. Even though it is offered to the hens they will not eat as much of it as they will in the winter, but they will have an opportunity of balancing up their ration. This is essential in order to get a large quantity of eggs.

During Rest Period Cow Should Be Fed Liberally

During the rest period the cow should be fed enough to get in extra good physical condition before she freshens. There is no necessity and surely no economy to feed heavily during the dry period. Two or three pounds a day may well be fed, largely ground oats and bran, with some corn meal if the cow is thin, and a small proportion of oilmeal. Then give the cow silage and good legume hay, and not make her subsist on poor roughages like fodder and timothy hay. During the dry period is a good time also to keep up the feeding of minerals.

STATE BOUNDARY LINES AT FAULT

Errors Run From Hundreds of Acres to Many Square Miles.

Washington, D. C.—"Work recently begun to check up the condition of monuments marking the straight line boundary between New York and Pennsylvania, and to find how far the line varies from its proper position, brings to attention only one of the scores of 'boundary skeletons' in the national closet," says a bulletin from the Washington (D. C.) headquarters of the National Geographic society.

"It is probably safe to say that not one of the forty-eight states is now administering exactly the territory which supposedly belongs to it," continues the bulletin. "In some cases the differences are only matters of hundreds or thousands of acres, but in others they must be measured by hundreds of square miles. These faulty boundaries are for the most part accepted now, especially in the states longest settled; but the agreements have not all been reached quietly. There have been scores of disputes between neighboring states and territories, dozens of lawsuits have been brought before the Supreme court, and in one or two cases bitterness has been so great that civil war has seemed on the verge of breaking out."

"The chief difficulty is in drawing straight lines. Anyone can draw a straight line on a piece of paper. He can construct a reasonably straight edged flower bed or driveway. But try to lay out a straight line some miles or hundreds of miles long on the face of the earth, over hill and dale, valley and mountain, and you are faced by a vastly more difficult problem."

"Many of the supposedly east and west lines between the colonies, later inherited as boundaries by the states, were laid out with no other instrument than the magnetic compass. The direction in which the needle pointed varied as the surveyor advanced; but in some cases no account was taken of this, and in others inaccurate corrections were applied. The lines, instead of being straight and running in a true east and west direction, were traced somewhat like rail fences between their terminal points, or struck off from the true direction at an angle and had to be brought back at intervals by offsets."

Plumb Lines Cause Errors. "Later when better instruments, astronomical methods, and higher mathematics were used the errors in running boundary lines were greatly reduced. An absolutely accurate line hundreds of miles long through rough country has never yet been marked out on the earth's surface, however, and probably never will be—chiefly because surveying instruments depend on plumb line or spirit level to establish perpendiculars, and these indicators vary with differences in density of the rocks from place to place. The closest approach to accuracy has been made by the 'triangulation system,' which the United States coast and geodetic survey has extended over a great part of the United States. Errors still crop up, but they are almost negligible. It is this triangulation system which has disclosed many of the rather glaring inaccuracies of the earlier boundary surveys."

"A number of boundary difficulties have arisen because of mistakes in geography. Thus the first boundary treaty between Great Britain and the United States in 1782 provided that the northern boundary of the United States should run from Lake of the Woods 'on a due west course to the river Mississippi—a physical impossibility. This error had to be adjusted later but the tiny projection of United States territory into Canada at the 95th meridian—like the sight on a rifle barrel—is a monument to the mistake."

"Another error that led to trouble was the belief that an east-west line through the southern extremity of Lake Michigan would cut Lake Erie at or north of the latter's western end. The extension of Indiana and Ohio several miles north of this old east-west line testifies to the correction that had to be made. The shifting of the Ohio line north, incidentally, was one of the boundary matters that came near causing civil war. Militia from both Ohio and Michigan were mobilized near the disputed territory in 1835 and bloodshed was avoided by the narrowest margin."

"One of the most peculiar state boundaries in the United States is the northern line of Delaware, which is the arc of a circle nicked out of the southeastern corner of Pennsylvania. Laying out the Delaware boundaries was a rather difficult problem in geometry and surveying combined. While the north line is an arc of a circle drawn from the center of the town of Newcastle with a twelve mile radius, the west line is in the main a tangent to the circle from the midpoint of a base line in the south between the Atlantic ocean and Chesapeake bay."

Spring Lamb Profitable

The spring lamb is the most profitable farm product farmers have been able to produce during the past few years. The spring lamb must be born early and fed well to make the most profit. Ewes should be bred within the next four weeks if one expects to make the most money out of spring lambs next year.

GLORIFY THE HOME!

The American home is a source of our present progress and prosperity.

When the home loses its influence, the nation is doomed.

When we fail to glorify the home, we then take the downward path.

The home should be given its due reverence.

Within its sacred precincts we find the foundation of everything that leads to worth-while achievements.

Therefore, let us exalt and sanctify the home!

It satisfies the deep-seated yearning that comes to every human soul. It brings peace, content and happiness.

God help those who have been denied the exalted privilege of home making!

They are to be pitied! And often they are the victims of misguided enthusiasts who have failed to grasp the fundamental principles of the great truths of life.

To possess something that is worth more than life itself should indeed be considered an inspiring privilege.

And where is there a mother or father who will not admit that he loves any one or all of his children more than life itself?

When an emergency arises wherein a parent can save a loved one by sacrificing his own life, a decision is quickly made in favor of his progeny.

"Glorify God in your bodies" is a Divine, Biblical command!

But many really religious people fail to catch the proper vision of the bodily needs. Consequently they are unfortunately minus the vitality essential in the building of family life, and sometimes they become obsessed with a wrong idea of the influence of bodily strength, vitality and beauty.

They are wont at times to criticize severely those who find inspiration in the sculptured outlines of bodily beauty.

Let us hope this sacrilegious attitude towards the body that was made in God's image will soon disappear. This disrespect cast upon the flesh and blood house in which we live is one of the principle causes of limited and the popularization of the frail physique which often brings sterility and at times physical, moral and spiritual disaster.

Nearly all criminals are defective physically. There are but few exceptions.

We hear so much at this time about the menace of the crime wave.

But back of all the evil forces that are referred to as the cause of the crime wave is the fast growing disrespect for the American home.

Marriages are decreasing; divorces are increasing.

A body that is 'glowing' with health can never house the mind of a criminal.

And not until this great outstanding cause of criminality is fully recognized and properly remedied can we expect a satisfactory decrease in criminality.

The American home can be stabilized and perpetuated only by maintaining the vitality and vigor of our people.

To glorify the home we must first give due reverence to our glorious bodies. We must exalt and dignify them to the highest pinnacle of human thought.

The family life will be honored above everything.

Parents who fail in their family duties will then be properly stigmatized!

BERNARR MACFADDEN.

Toys for the Baby

The instinct of a baby is to put everything into its mouth. A mother should choose for it toys that are smooth, that can be easily washed and kept clean, toys without loose parts that may be detached and swallowed. Brightly painted toys should never be considered.

STEVENSON'S

Men, Not Women, Wed for Money, Judge Finds

Chicago.—Men, not women, compose a majority of the gold-digger class in Chicago, Judge Joseph Sabath, veteran jurist of the Superior court, declared at a luncheon in the Elks club. He has heard 15,000 divorce suits. He said he had found that men, more often than women, marry with money in mind. "Women don't want alimony if they can help it," he asserted. Only about one woman in 500 asks for alimony when there are no children involved. "Feminine gold-diggers usually marry old and wealthy men. In such a case I am in favor of the woman. It is a good lesson for the aged man who thinks he can get a young and lovely wife for nothing. "The majority of women marry for love, but men in many cases think of the financial advantages."

Escaped by Camouflage

Matilda, daughter of Henry I of England used camouflage to escape from Oxford in 1141. Clothed in white, under cover of a heavy snowstorm, she passed unnoticed through the besieging army of King Stephen.

WOMEN WILL TAKE PART IN JACKSON DAY CELEBRATION

Chairman Harry D. Reichelderfer Names Chairman of Ladies' Committee Who Will Serve the Supper—High School Orchestra to Furnish Music—Get Tickets Now.

Harry D. Reichelderfer, chairman of the general committee in charge of the Jackson Day banquet to be held at the Memorial Hall on the evening of January 28th, has named Mrs. E. S. Stephens as chairman of the committee of twenty-five ladies who will serve the supper on that date, and are as follows:

Mrs. E. S. Stephens, chairman; Mrs. Charles Smith, Mrs. Senet Cryder, Mrs. Harvey Valentine, Mrs. E. E. Prose, Mrs. Ray Reid, Mrs. Ella Lindsey, Mrs. Robert J. Young, Mrs. Grace Goff, Mrs. John Bell, Mrs. Elliott Crites, Mrs. Albert Games, Miss Mary Heffner, Miss Lucile Neuding, Miss Winifred Parrett, Misses Marie and Ruth Reichelderfer, Miss Alicia Rooney, Miss Evelyn Tegardin, Miss Martha Mary Jacobs, Misses Helen and Eleanor Snyder and Miss Ruth Young.

Many of our Democratic ladies have signified their intention of attending the banquet and for that reason Judge Florence Allen was prevailed upon to be with us and make an address. Her subject will be "Citizenship." Miss Allen will be in Cincinnati on the 28th in attendance at a meeting of the State Bar Association but will leave there in the afternoon for Chillicothe, where she will be met by a committee composed of Mrs. Bernard Young, and Mr. and Mrs. Clark K. Hunsicker and escorted to this city. Those who have never heard Miss Allen will miss a treat if they fail to hear her on this occasion.

Governor Donahey and C. C. Williams, who will also be on the program for addresses, will arrive in the city in the late afternoon and will be taken in charge by a committee to be named later.

Report from the rural districts, already received, indicate that the allotment of tickets will be disposed of by Saturday night.

Mrs. E. S. Neuding, of the general committee, reports that arrangements have been made whereby the Circleville High School Orchestra, under the leadership of Professor Zaenglein, will furnish the music for the occasion. Our school orchestra has the reputation of being the best of any town the size of Circleville, in Ohio, so those who enjoy good music with their banquet will not be disappointed.

Every little detail is being carefully carried out in order to make the banquet a success. No doubt the mingling together at this time, together with the truths of good old Democracy instilled into them by the speakers, will have a tendency to make each true Democrat vow anew to do his utmost for the furtherance of the principles of the party.

Judge I. N. Abernethy, who will act as toastmaster, is too well known in that capacity to need any introduction, suffice to say, he is sharpening up his wit to assist to make the evening a profitable and enjoyable one.

If you have not arranged for tickets do so at once, as accommodations are for 500 only.

Tickets can be secured from the chairman, Mr. Harry Reichelderfer, Mayor Fitzpatrick, at the Printery, any of the County offices, or at the office of The Circleville Herald.

Had Other Claims to Fame

Queen Boadicea, who lived in Britain about the middle of the first century is said to have been the first prominent peroxide blond.

MILLIONS SAVED BY TRICK CAMERA

Remarkable Illusions Produced by Versatile Movie Engineers.

Hollywood.—The movie public has many illusions that are carefully created by trick photography and the versatility of engineers.

These secrets of the trade conserve millions of dollars annually in the budgets of producers. The directors point out, however, that they are not evolved to deceive the theatergoer, nor primarily with the idea of saving money; but often are necessary because it would be impossible to stage the actual scene demanded in the script.

In the photographic tricks the most indispensable perhaps is the "glass ceiling" illusion. This is a device of painted glass placed slightly above the camera lens. On the sheet of glass ceilings, domes or roofs are painted to correspond with the actual set.

Glass Work Necessary.
This glass work is necessary because of the lighting demanded by the camera. The roofs or upper parts of the set are not constructed. Instead strong flood lights are placed there.

Wrecks of ocean liners are enacted in a small tank in the studio. Howling gales are provided by mechanical wind machines. The "ocean" is lashed to fury by paddles, and the toy liner, perhaps ten inches in length, is tossed about on the waves by wires in the hands of studio assistants.

If the story calls for an explosion to sink the boat, a dynamite cap aboard is exploded at the proper time and the miniature craft sinks beneath the waves with exciting realism.

A recent example of miniature illusion was enacted in a picture of monstrous prehistoric beasts. On the screen they appeared to weigh tons and moved with lifelike ease. Before the camera they were models 18 inches high, composed of rubber and papier-mache, their movements manipulated by invisible wires.

Those Hair-Breadth Struggles.
When the movie spectator sees actors struggling perilously near the brink of a precipice or on the cornices of a tall building, he may be witnessing a scene "shot" in two different places. The fight may have taken place on the studio floor, and the camera man may later have photographed the precipice or roof corner on the same strip of film.

Fogs are formed in the studio by a huge atomizer, which feeds cold vapor on the scene through perforated pipes concealed about the set.

Adapted with high explosives, the engineers set a blast to wreck a dam, releasing a rush of logs and water to destroy a populated valley. Or they burn an actress at the stake with so little harm that she may be the belle of a party the next evening.

One engineer has patented a powder that burns furiously on the furnishings of a luxurious apartment. When the cranking stops the furniture is found unharmed and is moved to the next "social" set.

Even Hollywood scarcely knows these technical men whose exploits make "the filming of the impossible."

Oats Require Good Soil for Best Crop

To Avoid Winter-Killing Sow Plenty of Seed.

Oats are used mainly for hay or grain, seldom being turned under. They should be sown on good land. On poor soils they do not give satisfactory returns in either hay or grain, and make less growth than rye for turning under.

"Yet oats make a fine crop for farmers," says E. C. Blair, extension agronomist at the North Carolina State college. "Under favorable conditions they may be expected to yield 2,500 to 3,500 pounds of cured hay per acre. The hay contains 9.3 per cent protein, as compared to 5.9 per cent for timothy and 15.4 per cent for soy beans. A strong point in favor of oats is that hairy vetch sown with them will mature at the same time, making a hay richer in protein than oats alone."

"Oats often winter-kill severely. The best way to avoid this is to sow plenty of seed. Use at least two bushels per acre, sow them early enough to get a good start before cold weather. The best time is October. A good way to sow is to disk the seed in, or better still, drill them in, after corn or soy beans. It would be too late to sow them after cotton. October-sown oats far outyield late fall or spring-sown oats in both hay and grain."

Mr. Blair suggests that if oats begin to run up in the fall they should be grazed down or cold weather will damage them. They may be grazed for a while in the spring, but care should be taken not to graze them too long.

Fertilizer experiments made in North Carolina show that oats respond well to nitrogen. However, if the land is fertile, or has received a good application of fertilizer in the spring, oats need not be fertilized in the fall. They may be given 100 pounds of nitrate of soda per acre early in the spring if they appear to need it.

Oat hay should be cut when the grains are in the dough stage, then it is easy to cure and excellent in quality.

Dockage consists of dirt, straw, sand, weed seeds, and chaff. Why pay freight rates on 4,398,000 pounds of dockage every fall?

Smutty wheat results in enormous losses in yields of wheat and in the value of the contaminated grain. The odor and color of the smutty grain render it inferior for milling.

Musty wheat is very objectionable because of the bad odor it gives the flour. Nearly 4 per cent of the wheat received at Kansas City is marked down on account of being sprouted.

High Living Is Bad

There is always some mortality among hens no matter how well they are cared for. It is probable that most of the deaths among hens are due to long confinement in good houses with rich rations, night feeding and lack of exercise. This condition tends to bring on liver trouble and other disorders. It is one of the penalties the poultryman must pay for getting a larger number of eggs. His problem is not to save a few weak sisters but to breed a race of hens that can stand the gaff.

Try us for a Want Add.

FOLLOW THE CROWD

Some firms advertise by mailing circulars. Pickaway County has about 5,000 homes. Circulars mailed to each home costs the sender about \$150.

Money spent in this manner must be added to the overhead expense and the customer pays that expense.

The Circleville Welding Co.'s policy has always been to reduce expense and give the customer the benefit of the saving. Having been in business for the past six years we need no introduction. All the leading industries of Circleville and the many surrounding towns have their work done here. Why not you. We don't do a cheap job merely to meet competition but do you a real 100 per cent job at as a reasonable price as possible.

Welding and brazing is our business, nothing else. Bring your next job here and compare the difference in workmanship.

The time is passed when the measure of the value of a memorial is quantity. I hope the time has come when that measure is quality. I care not whether the material be marble or granite, its future will be measured by the character of the design. It is quality that has preserved for us the finest examples in painting and sculpture. It is quality that will stamp our imprint upon cemeteries of the future. Simplicity, correct lines and proportions and proper ornamentation are the real fundamentals. A design that is right, material that is lasting and perfect workmanship, spells success for the future of this industry and the beautification of the cemetery. Will you let me help you select the memorial for your lot. Call at show room. **NO AGENTS.**

Culling Poultry
Flock Is Favored

Economical Plan to Eliminate Poor Layers and All Surplus Males.

(Prepared by the United States Department of Agriculture.)

The most economical management of poultry requires that the flock be culled regularly to eliminate unprofitable birds. Poor layers and surplus males are a liability and should be disposed of. Weak and unhealthy birds should be killed and burned or buried deeply. There are several characteristics by which the poor layers may be distinguished. They almost invariably molt early and slowly, usually during August or September. The best time to weed out unprofitable hens is from about August 15 to about September 15. The better producers continue laying until late in the fall, and molt rapidly. Hens that have not

laid too much with black or horn color.

The vent of a hen that is laying heavily is large, expanded and moist, while that of a nonlayer is small, puckered and dry. In the case of the yellow-skinned breeds, the vent of a hen that is laying heavily is usually white or pink, but the vent of the non-layer is yellow.

When a hen is laying, the pelvic bones (the two pointed bones between which the vent is located) are rather thin, flexible, and spread well apart. When she is not laying, they are closer together, feel thicker, and are less flexible. The distance between the pelvic bones varies slightly in different breeds, it being usually 1 1/2 inches or more for a laying hen and less than 1 1/2 inches for nonlayer.

Abdomen of Layers.

The abdomen of the good layer is more expanded than that of the poor producer or nonlayer, since the egg-producing organs are larger and require more room. The abdomen of the laying hen is also flexible or soft because a smaller amount of fat is carried when laying, while the abdo-

Take Measurement to Determine if a Fowl Should Be Culled From Flock.

molted by August or September will show dirty, worn, or broken plumage, while those that have molted early show fresh, clean plumage or growing feathers at this time.

Poor Layers Marked.

There are other marks by which the poor layer may be picked out. The legs of hens that are naturally yellow in such breeds as Plymouth Rocks, Rhode Island Reds, Wyandottes and Leghorns are pale and faded in August and September if they have been laying heavily. If the legs are still yellow, the hen is almost certainly a poor layer. The same rule applies to breeds having yellow beaks, although the color fades more quickly from the beak than from the legs. The lower part of the beak bleaches more rapidly than the upper, and may be used as the guide when the upper half is colored.

men of the nonlayer is contracted, and harder and less pliable. The distance from the rear end of the breastbone to the pelvic bones also varies, according to the breed, from 2 1/2 to 3 inches for the good layer. A smaller distance between these bones would indicate that the hen is not laying.

When a hen is laying or nearly ready to lay, her comb and wattles are plump and bright red in color. When she is not laying, her comb is shrunken, pale or dull in color, comparatively hard, and covered with whitish scales. A dark or bluish color usually indicates sickness.

The poultry raiser should not only cull the entire flock yearly, but should always be on the watch for birds that are sick or very thin in flesh, or that show signs of weakness or poor vitality. When such are discovered, they should be culled out immediately.

Fix Grades of Hay
of Different KindsGovernment Favored Basis
on Nutritive Values.

Since the government recommended the establishment of grades of hay of different kinds on the basis of the nutritive values, hay is no longer just hay in the markets of the country.

The reasons for the grading of hay are just the same as those for the grading of any other commodity, says F. H. Steinmetz of the Minnesota agricultural experiment station staff, in charge of laboratory tests to aid in fixing hay grades.

Feed men wish to know how a shipment of hay is rated in order to be able to advertise and sell intelligently. Buyers wish to know what they are getting in kind, quality, and condition.

For example, alfalfa No. 1 is superior in feeding value and palatability to alfalfa No. 2. If a purchaser bought alfalfa No. 2 thinking it was No. 1, and there were no established grades, he would have no recourse. With grades established, however, he would have a chance to recover—if his purchase had been represented as No. 1 when it was really No. 2.

The same holds true as to prairie hays, among which grades have now been established.

The nutritive value of the hay itself, though, is not the only thing. Hay is frequently mixed with weeds and other foreign materials. Dealers and consumers should be able to know within reasonable limits how much such material any given lot contains. Weeds are objectionable because they are ordinarily unpalatable and cause mechanical waste, as animals will not sort out the good hay from the bad weeds. Moreover, there are some weeds which cause losses among live stock.

Hay grades are, therefore, highly desirable, says Mr. Steinmetz, and their use is to be encouraged in every way possible.

Fall Plowing Best

Early fall plowing is best, say farm crops division men of University Farm, St. Paul, Minn., because—

It gives a longer period for the decomposition of stubble and other vegetable matter turned over in plowing.

It opens the soil to the fall rains.

It helps to eradicate weeds which interfere with growth of crops.

It lessens the amount of spring work and permits of the prompt sowing of the crops in the spring.

It also lessens crowding and rushing times on the farm, and therefore is beneficial both to men and horses.

FARM FACTS

Infertile eggs from an incubator make good chick food.

Sudan grass is one of the best non-leguminous summer catch crops.

Legumes not only increase following crops, but provide an excellent feed in themselves.

In some cases the egg-eating hen can only be cured by a dose of iron—applied with the hatchet.

Plowing under a crop of hubam in the fall will add from 10 to 20 bushels per acre to the following corn crop.

Lice and mites are parasites which suck away poultry profits. It is a good investment of time and money to keep them in check.

Remember that a clean poultry house is desirable. Clean the droppings board once or twice a week. Offense in warm or damp weather.

Vegetables which may be planted this month for fall or winter use are carrots, turnips, winter radishes, late cabbages, late peas, sweet corn and late cabbage.

CONFESSED TO
POISONING OF
HER HUSBANDMrs. Christy Denies That She
Murdered Any of Her
Eight Former Spouses.

East Liverpool, O., Jan. 19 (UP)—Convinced that the woman has an insatiable mania for killing, authorities today impounded a sanity commission to examine Mrs. Laura E. Christy, 48, who has confessed, according to police, that she murdered two of her eight husbands.

Stubbornly defiant, Mrs. Christy, who admitted she gave poison capsules to her seventh husband and arsenic to her eighth, the Rev. William Christy, attache of the Christian Missionary Alliance, who died suddenly Wednesday, faced another barrage of questionnaires today.

Previously Mrs. Christy said she administered arsenic to her pastor husband at his own request to relieve his indigestion.

The woman reiterated emphatically that she did not murder any of her other husbands.

Of the eight, only two are living, according to Brooks. These are Frederick Harmon, Athens, New York, and Charles Graham, of East Liverpool, who has remarried and is residing here.

The husband who died besides Ebert and the Rev. Christy were Jacob Barnhart, Jesse Sears and George Holt, all of East Liverpool and Charles O'Neill, Cincinnati.

Love of Praise

In a word, we mean the gratification of our thirst for applause. That thirst, if the last infirmity of noble minds, is also the first infirmity of weak ones; and, on the whole, the strongest impulsive influence of average humanity: the greatest efforts of the race have always been traceable to the love of praise, as its greatest catastrophes to the love of pleasure.—Ruskin.

Hearsay Information

People in our town are not able to travel much, but are good listeners when anyone returns from a trip, and pick up about as much information as there is to be had. Likewise few of us are able to devote all our time to reading, but we have a few men who do, and they tell us what the books contain.—E. W. Howe's Monthly.

AMUSEMENTS

The Paramount picture, "The Coast of Folly," produced by Allan Dwan from the novel of the same name by Coningsby Dawson and starring Gloria Swanson at the Metropolitan theater this week, is what is described as a story "that is a warning for the girl who dares; an idyll for the girl who cares."

The picture brings Gloria to the screen in a story that is unlike "Madame Sans-Gene," her previous success, as day is from night. "The Coast of Folly" is laid against a background of Palm Beach and New York and offers the gorgeous Gloria her first dual role on the screen.

When Joyce Gathway is a little girl her mother runs off with a lover. Twenty years later, at Palm Beach, the celebrated "coast of folly" where so many lives, young and old, are wrecked upon the rocks of public opinion and the treacherous shoals of slander, Joyce Gathway, the very image of her mother, the infamous Nadine as she is termed, is the acknowledged leader of the younger set. She has inherited her father's immense fortune with but one provision and that a much discussed one, that in the event that she should ever become involved in any notoriety she automatically loses her fortune.

The gossips are chatting maliciously over her friendship with Larry Fay (Anthony Jowitt), the young husband of the notorious, cold and beautiful Mrs. Fay, played by Dorothy Cumming, who does not love her husband but who, on the other hand, hasn't the slightest intention of letting him—or rather his millions—escape her. Larry finds in Joyce all the companionship and understanding that he is denied by his wife, while to him Joyce is her real self which the code of "the coast" and her set forbid her to be—a natural, loving and whole some girl.

Complications develop with such startling swiftness that Nadine, now ensconced as the wife of the Count de Tauro—and she's deeply in love with her husband, hastens to New York from France determined to save her daughter's name and, if possible, promote her happiness with Larry. She subtly contrives to place Mrs. Fay, the cause of all the rumpus, in a compromising position.

With the climax develops the situation and the scandal attached to it herself if she wants to clear Joyce. Doing this will cost her the love and respect of her titled husband. It takes but a moment for her to decide and with her decision the picture comes to a truly unusual and appealing close.

Lost Little Island

During heavy storms which swept across the world, a little island town in Portuguese West Africa completely disappeared beneath the sea.

FRANKLIN'S OWN EPITAPH

GIVEN TO THE PUBLIC.

Benjamin Franklin's original epitaph, kept hidden in the collection of a Chicago business man since its discovery 20 years ago has been made public.

Inscription differs in only a few words and punctuation marks from the widely known epitaph of "Poor Richard." It follows:

"The body of B. Franklin, printer, like the cover of an old book, its contents torn out, and stripped of its lettering and gilding, lies here for worms. But the work shall not be wholly lost. For it will, as he believed, appear, once more in a new and more perfect edition, corrected and amended. —By the Author.

Ancient Dicing Games

The invention of dice is mythically ascribed to Palamedes of Greece about the year 1244 B. C. The game of tall among the Romans was played with dice. The early English antiquary, Stow, mentions two entertainments given by the city of London at which dice were played.

BIRTHS

To Mr. and Mrs. S. T. Hosler, of 140 Walnut street, Tuesday, January 19, at the Lancaster City hospital, a son.

SOCIAL CALENDAR

Mr. Willis Lockard was the honor guest at a surprise dinner given by his wife and son, Johnny, Sunday. The following guests were present: Mrs. Etta Dick and family, of Columbus; Mr. and Mrs. Roy Weise and Blanche Hery, of South Vienna; Mrs. Delmar Hardin of London; Mr. and Mrs. Harold Lockard and daughter, Kathryn, of Circleville; Mr. and Mrs. Alonzo Stonerock of Williamsport; John Dean of Fox; Mr. and Mrs. Henry Wrightsel, of Derby; Mr. and Mrs. Samuel Lockard of Bethlehem, Pennsylvania; Mr. and Mrs. Noah Wrightsel of Orient. At the noon hour a good dinner was served and all present did ample justice to the good things to eat. The day was spent in social conversation and violin and victrola music. All departed late in the evening wishing Mr. Lockard many more happy birthdays.

River Changed Course

The Hoang river in China burst its banks in 1851 and changed its course so as to flow into the Gulf of Pecheliee. Within two years its mouth had shifted 250 miles from its original position.

First Royal Astronomer

John Flamsteed, famous astronomer, was the first royal astronomer of England. He was appointed to that office March 4, 1675. He was a bitter enemy of Newton, because Newton tried to give him necessary advice.

Raccoon Collar, Large Buttons on Sports Coat

Plain but handsome imported mixtures make popular sports coats for the season. This smart model has flaring plaits below the knees, which is a new note in coat fashions. The collar of raccoon and the large buttons add to the beauty of the garment.

Accessories That Are Dear to Young Misses

Girls who pride themselves on being well dressed will need no caution about selecting the right hose, bags, gloves and incidentals, because they know that they are judged by just these little but important things. It is good training for any youngster to be given the best accessories that her family can afford and then be taught the care of them, because in this way she learns to appreciate nice things. For school she will want one of the new bulky leather purses that have the magical "zipper" closing. They are smart and practical and especially attractive in bright colors suitable to the young girl. Another good purse is of lizard or crocodile and exactly matches the shoes. Incidentally, this matching of purse and shoes is becoming a very important style note.

There are some very amusing "hankies" which a girl with any claim to chic will certainly want to carry. They are bright small silk squares that show a large, bold head of a clown or lady or grotesque animal. They are done in vivid colors resembling the design used by the Balkan peasants. They are very gay little things and give just the proper dash to a subdued and dignified costume.

Youngsters love ornaments of every description, and it is here that great care is needed to prevent a girl from overloading herself by wearing all her pretty baubles at the same time. She must be taught what not to wear in addition to what to wear and when to wear it. It is wise to select whatever inexpensive jewelry and ornaments are to be worn with each costume and then emphasize the fact that these details are part of the costume which they supplement.

Furs for Trimming May Be Found in All Widths

Those who care only for natural furs undyed will find them in all widths.

Among the new handlings one finds a plucked muskrat which feels just like Hudson seal and looks like beaver, but a little more gold in color. It is dyed in this lovely blond color. Another surprise is a moulton dyed in a little deeper shade—a very much glorified moulton, which the buyer said would not get a curled, knotty appearance if it were kept combed and brushed.

This moulton looks very much like a soft brown fox, but is much less expensive.

Light gray thibet looks like caracul, but it is less wavy and less expensive. Chinchilla is imitated more successfully this year than it has ever been, and even the little chipmunk has been imitated, but not as well as some other furs. Rabbit and cat fur still arrive under the rabbit's French name, lapin.

Embroideries for trimming come in bandings by the yard, some of them so put together that they may be cut into motifs and applied in the effort to save the time and labor on hand embroideries in color. It takes a master hand to make this applique successful. A few hand stitches must be added to keep the edges from looking chopped off. The difficulty of matching the silks used would alone discourage many persons. But if one can be satisfied to make her edges, her seams, her hems look like those of the professional, she can often use buttons to cover up other defects and to give a finished air to her little home-made frock without the labor entailed by another finish.

Rye Pasture for Hogs

Rye makes a splendid fall, winter and early spring pasture for hogs of all kinds. Fall pigs that have access to rye pasture during the winter make much better use of other feeds than pigs that do not have access to it. Brood sows that have access to rye pasture during the winter farrow stronger and thriftier pigs. Rye should be planted for pasture as early as moisture conditions will permit.

It is a good policy to cut the silage up fine. It packs in the silo better and also feeds better. It may take a little longer to put the stalks through the cutter when cut fine, but it pays well to do so.

Family wash at very reasonable prices. Inquire at Barnhill Cleaning And Laundry. We use soft water

His Part in Procession

You know how the Rotarians do at their dinners, when they stand up and tell in what business they are engaged. George Marble tells of an undertaker, when called on at one of these meetings who rose and said, "I follow the medical profession."—Capper's Weekly.

Tobacco-Stained Teeth

To remove tobacco stains from the teeth place a small amount of fluoride of ammonia on a piece of absorbent cotton and allow it to remain on the teeth for about a minute. Care should be taken not to let this touch the gums or get into the throat. After the cotton is taken off, the mouth should be rinsed with cold water.

Knew Ground Thoroughly

Gen. Lew Wallace visited the Holy land many years after he wrote "Ben-Hur." So extensive had been his studies that he afterward said that he did not find a single error in his record.

Temple Cut Out of Rock

Ellora, British India, contains a unique temple cut entirely out of rock, both inside and outside. It is about eighty feet high, and is elaborately carved. It was made before the year 1000 A. D.

FARM NOTES

Fresh manure may be spread on the garden in the fall.

Think of weeds as leaks swiftly depleting the water supply. But don't just think.

Last call for the cull hens. After September 15 it is difficult to pick the poor ones.

The best way of pasturing soy beans with hogs is to grow the beans with corn and then hog the combination down.

It costs just as much to raise a 40-bushel crop as one that yields 50 bushels, so why not plant your farm to adapted varieties?

Limberneck Is Result

of Ptomaine Poisoning

Limberneck or blind staggers, as it is sometimes known in some localities, may be the result of ptomaine poisoning caused by eating some rancid food which, in the case of poultry, generally means decayed meat. It may, however, mean moldy grains. Sometimes it comes about merely by acute indigestion caused by clogging the system in some way, possibly by feeding too much fiber such as is found in the hulls of oats, barley, etc., or allowing them to eat dried, tough grass.

The thing to do is to starve the birds for a day or so to get the crops empty and then give each one a teaspoonful or two of olive oil and empty the crop. Give the fowl in the meantime access to nothing but sand or grit and water. Then feed some easily digestible, highly nutritious feed, such as bits of raw meat that have been slightly broiled; or, if the fowl can handle it, stale, dried bread soaked in sweet milk.

County Record for
Use of Pure BredsAll Classes of Live Stock In-
cluded in List.

(Prepared by the United States Department of Agriculture.)

With 592 live stock owners officially enrolled with the United States Department of Agriculture as pure-bred sire users, Pulaski county, Va., is the premier county of the United States in the extensive use of pure-bred males in live-stock breeding operations, so far as the department's records show. A recent report of the bureau of animal industry of the department notes that Pulaski county contains 843 farms reporting live stock, according to the last census, making pure-bred sire users about 70 per cent of the total. The figure applies to live stock owners who use such sires for all classes of live stock raised, including cattle, horses, swine, sheep, and poultry. The census reports 970 inclosures, not farms, which would lower the percentage considerably, but would still permit the county to hold its premier position with respect to the wide use of pure-bred sires.

Union county, Ky., is the only serious competitor of Pulaski county. The figures given have added significance when considered in the light of reports which the department receives frequently on the benefits derived from the breeding of improved stock. From a financial point of view the widespread use of pure-bred sires may be expected to bring fully \$100,000 additional returns to the farmers of a good live stock country. This estimate is based on calculations from county agent sources and is believed to be conservative. The bureau of animal industry has consistently urged the use of good pure-bred sires as a sound and practical method of live stock improvement. Responses from stock owners who have adopted the method have shown general satisfaction with the results.

Silage From Immature

Corn Good for Cattle

Immature corn can be made into a good feed for cattle by putting it into a silo, says J. B. Fitch, head of the dairy department of the Kansas State Agricultural college. Many silos were built this year to store the short corn crop. If above ground silos are not available and their purchase cannot be financed, pit silos, trench silos and silos made from flooring or other home-made silos can be used, according to Fitch.

"When this corn has reached the point where it will not grow any more it should be cut and put into a silo or stacked," he advises. "If it is allowed to stand in the field the leaves will shatter off and the crop deteriorate quite rapidly when exposed to the weather."

"Immature corn is being cut this year with headers, grain binders, and mowing machines. When put into the silo the crop can be handled about the same as any other silage crop with the exception that this material cannot take up as much moisture as it would if mature. The amount of water added there should be watched carefully."

"Silage from immature corn will not be equal in feed value to good corn silage, but the silo is a means of preserving this corn and changing it to a palatable feed without loss."

Soy Beans for Pasture

Soy beans can be pastured by any kind of live stock, but they are more especially adapted to hogs than to cattle. For cattle our advice would be to harvest the beans and make hay. If desirable the beans can be permitted to ripen and be harvested for the seed and the straw fed to cattle, it having a higher feeding value than corn stover. The soy-bean seed can be ground and fed to cows in the place of cotton-seed meal.

FARM FACTS

Remove brush and weeds from fence corners and ditches.

Quality, not quantity, is the important consideration in dairy farming.

Acid phosphate applied at the rate of 150 pounds per acre just before seeding will pay big returns.

To adjust production to the demands of the market is the pertinent problem of farm management.

A dozen horseshoes over the door won't prevent the "bad luck" that comes from not keeping pace with better farm practices.

Can eggs while they are cheap, making it possible to sell the fresh winter eggs at a time when they bring the highest price.

Soy beans containing between 30 and 40 per cent of dry matter when put into the silo keep well and show no greater loss of nutrients than does corn.

Cows that produce less than 9,000 pounds of milk and 325 pounds of butterfat a year are hardly worth keeping. Ohio cow-testing association records indicate.

Cowpea silage is somewhat more difficult to make than silage from other leguminous crops. Unless the dry matter content is fairly high the silage will be bitter and unpalatable.

My Favorite Stories

By IRVIN S. COBB

Where Higher Education
Would Have Landed Him

Some fifteen years ago there landed in New York a friendless and almost penniless Russian immigrant who found lodgings on the East side, and at once, with racial perseverance and energy, set out to earn a living.

He was of a likeable disposition, and speedily made acquaintances who sought to aid him in his ambition. One of them sponsored him for the vacant post of janitor, or shammos, to use the common Hebrew word, of a small synagogue on a side street.

But when the officers of the congregation found out the applicant was entirely illiterate they reluctantly denied him employment, inasmuch as a shammos must keep certain records.

The greenhorn quickly rallied from his disappointment. He got a job somewhere. He prospered. Presently he became a dabbler in real estate.

Within ten years he was one of the largest independent operators in East side tenement-house property and popularly rated as a millionaire. An occasion arose when he needed a large amount of money to swing what promised to be a profitable deal. Finding himself for the moment short of cash he went to the East side branch of one of the large banks.

It was the first time in his entire business career that he had found it necessary to borrow extensively. He explained his position to the manager, who knew of his success, and asked for a loan of fifty thousand dollars.

"I'll be very glad to accommodate you, Mr. Rabin," said the banker. "Just sit down there at that desk and make out a note for the amount."

The caller smiled an embarrassed smile.

"If you please," he said, "you should be so good as to make out the note and then I should sign it."

"What's the idea?" inquired the bank manager puzzled.

"Well, you see," he confessed, "I haf to tell you somethings: Myself, I cannot read and write. My wife she has taught me how to make my own name on paper, but otherwise with me reading and writing is nix."

In amazement the banker stared at him.

"Well, well, well!" he murmured admiringly. "And yet, handicapped as you've been, inside of a few years you have become a rich man! I wonder what you'd have been in this country by now if only you had been able to read and write?"

"A shammos," said Mr. Rabin modestly.

LIABILITY INSURANCE

What It Is and the Benefits That Accrue to the
Policy Holders.

I wonder if you realize that every car owner is responsible to the public for the operation of his car, whether he drives it himself or allows others to drive it.

PUBLIC LIABILITY is an insurance term indicating the responsibility the car owner is under for injuries or death inflicted on persons thru the operation of his car.

It is most important of all automobile insurance features, owing to the unknown possibilities of the claims.

Some of the factors making accidents and consequent liability claims daily more numerous, and the owner's risk in operating a car an ever increasing one, are:

CONGESTION OF TRAFFIC. Roads are about the same width as formerly, yet traffic thereon has greatly increased. Between fifteen and twenty million motor vehicles are registered in the United States today. This vast number is being increased daily.

LOW PRICES OF SECOND-HAND CARS have added greatly to the number of irresponsible drivers, who menace all other users of the roads. The careful, sane driver is often the sufferer from the faults of others. IMPROVED HIGHWAYS are a constant temptation to speedsters and encourage less careful attention on the part of all drivers.

THE CHILDREN MUST PLAY, and there being very little yard space around the average city home, the playing is done in the path of the motorists. The heavy tolls of 1924 in life, injuries and property losses have been given wide publicity in the press of the country.

AMBULANCE-CHASING LAWYERS (and there is one or more in every city) make a business of creating cases against any car owner involved in an accident, whether or not it is serious, whether or not he is liable and particularly if he has property.

COURT CHARGES AND ATTORNEY'S FEES MUST BE PAID, and eventually, possibly a heavy judgment to be paid with interest and costs. The feelings, sympathies and judgments of juries are generally in favor of the injured and against the car owner. Verdicts for injuries or death run into thousands of dollars, and are larger than ever before. Even if you win, your expenses mount to a large figure.

An automobile liability guarantees the investigation of claims whether you are liable or not, adjusts, pays, fights your case if necessary, pays expenses, lawyer's fees and court costs, relieves you from responsibility and worry. It does all of this for the owner and for any one legally operating the car with the owner's permission.

If you are now carrying liability insurance, the above facts will serve to strengthen the conviction that led you to protect yourself.

This information, coupled with the fact that last year no fewer than twenty-eight states introduced bills for compulsory liability insurance, is conclusive evidence of the advisability of every car owner relieving himself of personal liability.

HUGE TANK
EXPLODES

Gauger Injured, Probably Fatal-
ly—Damage Reaches
\$200,000.

El Segundo, Calif., Jan. 16.—One man was injured, it is believed fatally, and property damages estimated at \$200,000 was caused when an 80,000-gallon tank of distillate exploded at the Standard Oil Company refinery here today.

Alfred Collier, 19 years old, of Inglewood, a gauger, was working on top of the tank when it exploded. The cap of the huge tank blew off, carrying Collier a distance of more than 100 feet.

The heavy steel tank was melted almost to the ground. Firemen from El Segundo joined the oil company squad and quickly had the flames under control to protect the near-by tanks.

Sell Old Fowls in Fall
to Save Winter Feeding

A good many people are adopting the idea of selling the old hens in the fall of the year after they quit laying. This saves keeping them through the winter. Besides the pullets are the best winter layers. Keeping the old hens only adds to the expense without increasing the returns proportionately. The principal advantage in keeping the old hens over is to have enough of them to lay the eggs which are necessary for hatching. If only pullets are kept over the hatch may be disappointing.

People who follow the practice of buying baby chicks every spring should keep only pullets. These people can sell off the cockerels as soon as they are marketable. In this way they can keep their flock working at the highest possible rate of speed.

Possession given as soon as deal is made.

100 acre farm, good 2 story frame dwelling, good barn, poultry house, corner and other good buildings, well tiled and fenced, all tillable, close to school and market \$12,000. Possession given March 1, 1926 with terms to suit purchaser.

208 acre tract, 6 room frame dwelling, good 8 horse frame barn 4 car garage, steel corn crib, granary, two wind pumps and engine well tiled and fenced, good black soil, all tillable, located near a good market, \$135 per acre

JOHN W. LANGLEY

Begins Sentence—Former Kentucky Congressman Enters Atlanta Penitentiary.

Atlanta, Ga., Jan. 16.—John W. Langley, for 20 years Congressman from Kentucky, entered the Atlanta Federal Penitentiary here today to begin serving a two-year sentence imposed on conviction of conspiracy to violate the national prohibition law.

Stating that he was suffering from high blood pressure and from a tremendous mental strain, he had to be assisted up the long steps of the railway station. He chatted for a few minutes with newspaper men and posed for photographers.

"I am going to make a model prisoner," Langley stated, "and I am confident that the public eventually will realize my innocence."

Langley was convicted two years ago with two other men of conspiracy to remove 1,200 cases of liquor from the Belle of Anderson distillery in Kentucky. The case was appealed to the Supreme Court, which refused to review the case, and he resigned from Congress and asked his constituents to elect his wife to succeed him. The date for the election has not yet been set.

KEEPING WELL
LIME BURNS THE EYE
DR. FREDERICK R. GREEN
Editor of "HEALTH"

THE eye is one of the most sensitive organs of the body. Everyone knows how painful a speck of dust or a grain of sand in the eye can be. Any foreign body in the eye causes irritation, pain and congestion. When the foreign substance also causes burning of the eyeball, it is not only painful but dangerous to the eye and the eyesight.

One of the most dangerous substances which can get into the eye is quicklime. Such accidents are not uncommon among bricklayers, plasterers and others who handle this dangerous substance.

As Ramsay, a recognized authority says, "In case of quicklime, the severity of the burn is due to the fact that the lime usually remains for a considerable period in contact with the tissues and its powerful escharotic action has time to take effect. The slightest particle of it, entering the eye, gives rise to the most intense irritation, leading to spasmodic closure of the eyelids and the copious secretion of tears, a combination of circumstances which is most favorable in ordinary cases for the expulsion of a foreign body, but, which in the case of lime is most unfortunate, because by the firm closure of the eyelids the lime is pressed against the eyeball, while the tears, which ordinarily wash out any foreign body, slack the lime, producing heat which increases the destruction of the eyeball. The lime, in burning leaves a crust on the eyeball made up of calcium carbonate, an insoluble opaque substance, which prevents the light from passing through the cornea and so interferes with vision."

In some cases in which small pieces of lime have gotten into the eye, vision has only been partially affected but, if any large amount of lime has come in contact with the eyeball, the result may be nearly complete loss of vision or even total blindness. Loss of sight is a serious misfortune to anyone, but to a working man it is a calamity and may convert an able-bodied tradesman into a dependent pauper.

The treatment of lime burns consists in the removal of the lime as soon as possible. This is best done by a stream of cold water. Many solutions have been used to neutralize and dissolve the lime. Milk, olive oil, sugar solutions and other substances have been tried with but little success. The best results have been gotten from neutral solutions of ammonium chloride. This substance neutralizes the lime, forming a soluble crust which can be dissolved and washed out. In order to do this properly, however, the eye must first be deadened by a cocaine solution and the ammonium chloride must be freshly prepared. This makes it necessary for such treatment to be carried out by an experienced oculist.

In all cases of lime burns of the eye, the eye should be immediately washed out with cold water and the patient should be sent at once to a competent specialist. Such treatment may save the eyesight and prevent the victim from being crippled for life.

Sociability
Luncher (to a man who is making off with his overcoat)—I beg your pardon, sir, but in case we don't meet again, may I have a couple of cigars out of the pocket?—Dartmouth Jack 'n' Lantern.

YOUNG MEN SEEK
HELPFUL WIVES

Are Advised by Betty Fairfax to Select Girl Who Is Wise Enough To Dress Ample In Winter, Assuring Herself a Life of Good Health—Must Know Value of Money.
By Betty Fairfax.

Three young men wrote me a joint letter in which they asked me to advise them of the type of girl who will make the best wife. They say they earn good wages, and have steady work. They can pay down a nice sum for a home, and finish by monthly payments. So they want the kind of girl who will be helpful in getting a home and keeping it.

First I want to say that there are several things necessary besides love in marriage. That comes first, if it is the right kind; next is good health. I am sorry for any man who is handicapped with a delicate wife, and in the first place it is not necessary for so many women to be delicate. They make themselves that way.

If I were a young man, I would never marry a girl who goes around in winter wearing silk stockings and satin or velvet shoes out-of-doors. Every day I see business girls on the streets in rain, or snow and mud, with their feet and legs encased just that way. Some of the stockings are the veriest chiffon, and one has to look twice to see whether the girl is wearing stockings at all. No overshoes are worn, and feet get wet.

As sure as fate a girl who goes on the streets that way will grow into a delicate woman before she is 30 years old, unless she dies of tuberculosis before that. It is absolutely necessary to keep the feet and legs warm, if a girl is to be comfortable, and if she becomes chilled, she is sure to be affected by that.

So my advice to a young man is to see that the girl he is thinking of marrying is healthy and wears sensible clothes. If she isn't, let her pass by. He wants a beautiful wife, but beauty does not last long, and good health does.

Then I advise that these young men, readers find a girl who knows the value of money. If they have not been employed commercially, they can learn to handle their allowance at home economically. America's wealthiest men always make a very small allowance on one garment, they must wait until the next month for more. That is the best lesson in the world for young people.

So to my young men who asked the question, I will say these three things are necessary to a happy marriage—love, health and economy, and the greatest of these is health.

TRY US FOR A WANT AD

Pigs Quite Susceptible
to Cocklebur Poisoning

The common cocklebur or clotbur has long been suspected of being poisonous but now its toxicity has been definitely established. Cattle are occasionally poisoned, but young pigs are most susceptible. The burrs may produce mechanical injury but this is of secondary importance. Only young plants in the cotyledon stage are dangerous. The mortality from cockleburs is not high for the reason that, while they are widely distributed, they are seldom eaten. Pigs that have been fed milk cannot be killed with cockleburs experimentally. This suggests that probably the best treatment for acute cases is the administration of fats and oils, such as milk, bacon, grease, and linseed oil.—George H. Glover, Colorado Agricultural college.

Repair Laying House

This is a good time to repair the laying house before the fall cleaning and preparation for early pullets. Roofs may need patching. Knot holes should be filled or covered, putty renewed on window sashes, new curtains put in for old ones, and door hinges tightened. Perhaps a coat or two of paint over the entire building would help both the appearance and preservation of the structure.

5 PER CENT MONEY
TO LOAN ON FARMS.

We can make a loan of any amount for 5 or 10 years permitting payments on the principal of \$100 or any multiple thereof at any interest paying date after the first year. Loans closed promptly.

Call and see us.

Are You Buying Where
The Buying Is Good?

SALESMANSHIP has sold many an automobile, but it takes more than a selling talk to deliver day-in-and-day-out satisfactory automotive transportation. The man who buys a car is more often pleased than the man who buys a prospectus of one.

Behind every car we sell is a great, modern institution dedicated not merely to the selling of cars, but to the daily needs of the man who has bought a car.

Irish Fantasy

A leprechaun is a pygmy sprite, according to Irish superstition. He is described as a manikin less than two feet high, dressed in a cocked hat, taced coat, knee breeches and silver-buckled shoes. Leprechauns were generally makers of bog-roads.

A Personal Matter

By H. IRVING KING

(Copyright.)

AFTER she had mailed the letter Louisa was alarmed over what she had done. Never before in her whole placid and guarded life, had she so broken over the bounds of the conventionalities. But the little town in which she lived was prosaic.

So when one day she saw in the "personal column" of a New York paper which had strayed her way an advertisement stating that a "Respectable young man," who was lonely in the great city, would like to correspond with a young lady who was lonely in the country with the idea of a mutual cheering up, she answered it. It seemed to fit her case. She did not sign her real name, of course. She thought Eleanor Fitzallen sounded more romantic. She told them at the post office—Louisa always went for the family mail—to put any letters for "Miss Fitzallen" in her box. She was a cousin of hers whom she was expecting on a visit.

The family consisted of Louisa, her mother and a small brother—who was on no account allowed to get the mail, for he was apt to lose the letters. And her mother never took the trouble to stop for the mail. The lonely young man in the city gave his name in the "personal" as George Blakesley and his address as "general delivery." So there was not much clew to him. Louisa's letter to George was very proper and impersonal. Really she had written it largely out of curiosity as to just what sort of a reply she would get.

To her great surprise the unknown George wrote back a missive as proper as her own, couched in rather stilted language and betraying evidences of bashfulness. This from a young man who had advertised for a young lady to correspond with! "Well," thought Louisa, "for once in my life the unexpected has happened." And after a proper interval she wrote the young man again. And thus there grew up a very proper and exceedingly friendly correspondence. Finally George, the unknown, asked Louisa for her photograph. The wicked girl sent him the picture of a third cousin of hers which she happened to have by her.

Then she became alarmed and resolved to drop the whole business. She realized that she was getting rather fond of George—and she did not know who George was or anything about him. And she never could know—never wanted to know; for if he was the sort of young man he appeared to be from his letters she would be consumed with shame to meet him, or have him know that she, Louisa Trafford, had answered a "personal" in the paper and carried on a correspondence with a man to whom she had never been introduced. George wrote twice beseeching a continuance of the interchange of letters but received no reply.

But how Louisa did miss that correspondence! She blushed as she acknowledged to herself that she had never enjoyed anything so much in her life. She grew moody and restless and told her mother that she really must have a change. So she went to visit her Uncle Roger in Newark. He had several daughters who had lots of company—many young men among them—and, sad to say, in this new and more lively environment Louisa almost forgot about the lonely George. Still his letters remained to her a part of some pleasant dream she had once had. Uncle Roger's wife was a great matchmaker and set about picking out a suitable husband for Louisa immediately.

Mrs. Roger pitched upon Claude Lambton as the one to marry her niece. He was a lively young man, fond of yachting and golfing, and his father was said to be immensely wealthy. Louisa did not dislike him—but how different he was from the George of her late dream. She could never think of him as a husband. However, they became quite friendly.

One night as Claude and Louisa were sitting out a dance at Mrs. Somebody's, Louisa began to rally him on his lack of seriousness.

"But I have a very serious nature," he replied. "It is only of late that I have been as you see me. I—I in fact—am trying to forget."

"That sounds melodramatic," said Louisa. "A love affair, I suppose—one of the hopeless sort?"

"Yes," said he gravely. "Hopeless and strange. All that is left to me now of that blighted romance—forgive me if I seem sentimental—is this picture." And he drew a velvet case from his pocket and handed it to his companion. "I always carry it with me," he said.

Louisa opened it and saw the photograph of her third cousin which she had sent to the lonely New Yorker. "Oh, you are George!" she cried. "George!" gasped Claude. "Yes," said Louisa, crying softly into her handkerchief. "I'm Eleanor—that's the picture of my third cousin. I sent it to you."

After they had both quieted down a bit there were explanations. He had put the "personal" in the paper on a bet of his companions that he did not dare to do so. After he received Louisa's first letter he sent regularly to the New York post office to get the others, with the result already told. Taking everything into consideration it really did seem as if fate had determined them for one another—and they submitted to fate.

MAYOR'S COURT

Charles Nixon, a drunk and disorderly was placed under arrest Monday evening and was placed in the city prison.

BRIEFLY TOLD

—William Henry Grant, son of Vernon Grant, of Jackson township, is the senior warden of the George G. Wagner Masonic lodge at St. Mary's, Pennsylvania.

FUNERAL OF MRS. BARTLEY.

Funeral services for Mrs. Elizabeth Bartley will be held at the United Brethren church Wednesday morning at 10 o'clock. Rev. S. W. Hiles, officiating. Burial in Forest cemetery.

Missiles for Cannon

In the Middle ages various missiles were shot from cannon. Bolts are mentioned in 1413, and in 1418 Henry V ordered his clerk of the ordinance to get 7,000 stone shot made at the quarries at Maidstone. Since then chain, grape, and canister have been invented, as well as shells.

KNIGHTS-TEMPLAR.

TO START COMMUNISM PROBE AT O.S.U.

12 PROFESSORS ARE CITED TO APPEAR BEFORE BOARD

Chief of Police French Gives Student Body Clean Bill of Health as to Liquor Charge—Sensationalists Who Like to See Their Names in Public Print Are Authors and Instigators of Investigation—Indications are That It Will Fall Flat.

All professors and instructors of Ohio State university who have been mentioned during the investigation by a special committee of the board of trustees into alleged communistic activities in the institution are to be called by the committee for an inquisition.

Announcement of the course was made Monday night following a day of review of moral conditions among the student body and of inquiry into the foundation of charges of communistic teachings by the nominal author of the resolution for the proposed investigation by the Ohio general assembly, Senator James R. Hopley, Crawford county, and the actual author, Dr. Clarence E. Maris, Columbus.

The next question to be taken up by the committee is the views of students concerning drinking of intoxicating liquor by classmen with members of the student group as witnesses.

The Columbus police force gave to the men who are acquiring knowledge at Ohio State a clean bill of health, adding that conditions constantly are becoming better and that there is less and less violation of law among them.

Students, it is anticipated, are expected to admit there is a measure of violation which the responsible campus eliminate. Since Governor A. V. Donahey demanded an investigation after the arrest of Charles Dabney Horton, instructor, the students have conducted their own research. They have found that drinking is at a minimum, but that further improvement is possible. Columbus police said conditions or moral scores are nearly ideal.

The latitude to be taken by the committee in its inquiry into personal and private political views and activities of individual members of the faculty has not been divulged by the body which is working with George W. Rightmire, acting president. It has been intimated that these investigations may take a wide scope, and not merely be limited to classroom views and theories. Professors who have been listed as members of "Red" organizations are eager to obtain vindication.

Among those named are Professors George L. Alps and J. A. Leighton, nationally known leader in their fields in the university. Others less widely known are Francis W. Coker, Homer C. Hackett, O. A. Norman, Milton Percival, Carl Wittke, E. S. Ingraham, Albert B. Weiss, Carl C. North, E. A. Culler, G. H. McKnight and H. R. Spencer.

Dr. Maris occupied hours in expounding his notions of the teaching staff, declaring that as a political writer he had assailed the university for years because of the communistic theories that went forth from the institution and that he was happy in the opportunity to vindicate himself.

Dr. Maris spoke slowly and at times wandered far afield, but ascribed his halting speech to feeble health. The committee gave him opportunity to nurse his own methods in developing his ideas.

Briefly he assailed the institution because professors and instructors were members of organizations like the committee of 48 which supplied the nucleus of the independent movement in behalf of the late Senator Robert M. LaFollette for president in

1924. He said such organizations gave encouragement to "Red," Communist, Socialist, Bolshevik and Fabian societies, placing all of them on a parity.

Senator Hopley said he had no personal knowledge of communism among faculty members. His information was obtained from Maris, who in turn said he received his information from newspapers.

Senator Hopley denied that he ever had heard professors or instructors discuss communism or violent overthrow of the government. Parents of students told him, he said, that subversive doctrines were taught in the university, but he declined to give names unless consent of the parents was obtained.

SOME RECORD HAS NOT LOST DAY IN YEARS

January 20, will be a red letter day in the life history of J. H. Drum, agent of the Scioto Valley Traction company.

Mr. Drum will have served five years as station agent for the company and in that time has not lost one day's time. He does not observe the unionized time of eight hours, but works twelve hours and forty minutes each week day and ten hours and forty minutes on Sundays. This is refreshing when you stop to think that in these modern working days, a fellow thinks he has accomplished a lot when he works on an eight hour shift.

D. F. HOLTMAN

Dudley F. Holtman of Chicago, recently appointed by Secretary of Commerce Hoover as assistant director of the national committee on wood utilization. Mr. Holtman has developed a number of important services to make it easier for the lumber consumer to understand the physical and mechanical properties and characteristics of different species of wood, and to get lumber which is suited to his needs.

THE SICK.

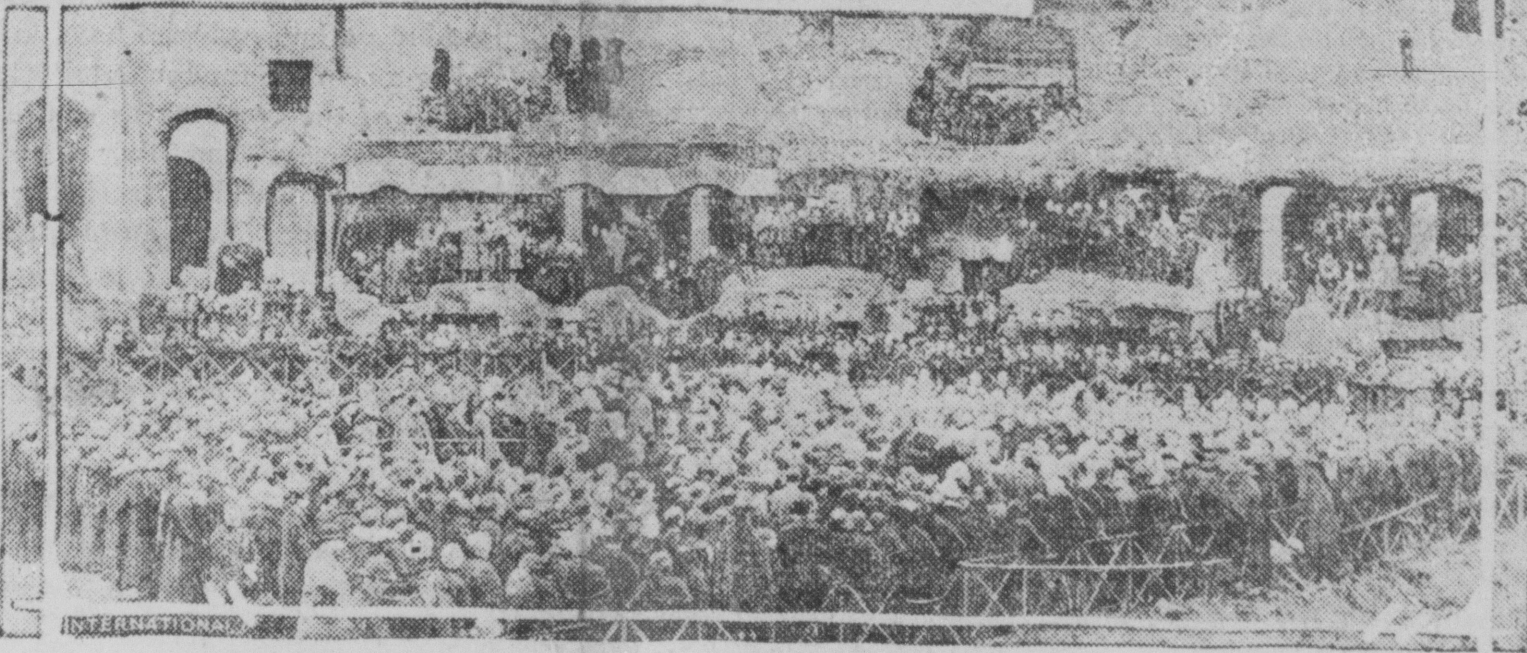

Mrs. A. M. Hope, of Columbus, who has had charge of the case of Miss Laura Mader, took ill this morning and returned home. Miss Mader is getting along nicely since her accident.

HOME FROM HOSPITAL.

Mrs. E. L. Tolbert returned home Monday from Mt. Carmel hospital, Columbus, where she underwent an operation three weeks ago. Mrs. Tolbert is making a nice recovery.

Christian Cross Replaced in the Coliseum

Here is pictured a general view of the ceremonies in the ruins of the old Roman coliseum marking the dedication of the cross by the church on the spot where the early Christians died. Centuries ago the first cross was placed there but when the popes lost the temporal power it was removed. Now it has been replaced by Premier Mussolini in deference to the wishes of Pope Pius.

HAPPENINGS IN OUR STATE

Taken Direct From Wires
By Correspondents of the
United States Press
Association.

Sandusky—Mrs. Mary Keller, 47, today began her fight to escape the electric chair as the slayer of her 7 year old daughter, Fay Elizabeth, whom she told police she gave poison to save her from a life of poverty. The grind of obtaining a jury started this morning before Judge W. L. Fissinger, in common pleas court.

County Prosecutor Moyer scouts the "mercy murder" theory that Attorney James F. Flynn, voluntary defender of the mother expects will clear Mrs. Keller. Assisted by City Solicitor Sayord, prosecutor Moyer plans to demand the death penalty. It is expected that two days will be consumed in obtaining a jury.

Gallipolis—Miss Bertha Gray, 20, of Wellston, died here today from injuries received in a coasting accident several days ago at Wellston.

Columbus—Logan Wilson, 37, was exonerated of the death of Mrs. Elizabeth Mulligan, 48, who was run down and killed by Wilson's automobile on Monday night as she stepped from a curbing.

Wilson said Mrs. Mulligan stepped into the path of his machine. He was traveling fifteen miles an hour, he said. Her neck was broken and her skull was fractured. Mrs. Mulligan was the wife of a railroad conductor.

Pomeroy—Echoes of the alleged sabotage which resulted in the destruction by fire and dynamite of coal tipples in this section last summer were heard today when Common Pleas Judge Miller sentenced Jesse Muney, a miner, to 15 years in the state penitentiary.

Muney was accused of stealing dynamite from a powder house. Three other miners were arrested with him and warrants were issued for others. It was charged the explosive was used in destroying the tipples.

Lorain—More than \$3,000 in loot taken by Lorain's phantom bandit in forty robberies during the last two months was returned Monday.

The loot, consisting of money and jewels, had been placed in a box and left on the steps of a school. The box was found by two boys and turned over to police.

The return of the stolen articles was not due to conscience, however, because the burglar entered four more residences Monday night. In only one the home of a minister, was anything taken.

KINGSTON FAIR FARMERS MEET IN THIS MONTH

Sessions Will be Held in the
High School Auditorium
January, 28 and 29.

Plans are nearing completion for the Community Fair and Farmers meet at the Kingston high school auditorium on January 28-29. The officers and committees are as follows: President, W. K. Orr; secretary, Floyd Hickle; lady correspondent, Mrs. D. H. Driesbach; treasurer, Frank Sharp; committee on resolutions, M. A. Shapard, Rey. W. S. Fisher and Frank Sharp, nominating, F. P. Long Ed Spence and A. D. Ellis.

Exhibit, Mr. Ed Umstead, Wilbur Metcalf and F. I. Rittenour; publicity Miss Margaret Thomas, Mrs. D. H. Driesbach, Mr. Paul Johnson, Mr. W. R. Sunderland; decorating, Miss Alspach and Gerald Patrick; dinner, Smith Hughes, home economics, pupils. The merchants have already boosted the "Meet" by offering a number of valuable premiums.

On January 20, there will be one day "Free Tractor School," given by Warner and Dreisbach, at their store room on West Pickaway street. Free school, free dinner and also a free picture show at the high-school theater in the evening.

PERSONALS

Mr. and Mrs. W. B. Frederick were business visitors in Columbus today. Miss Katharine Foley spent the day in Columbus.

Mrs. S. E. Evans, Mrs. Leon Van-Vliet and Miss Ruth Grubbs spent the day in Columbus.

Mrs. William Chadwick went to Akron today to visit her daughter, Mrs. W. J. Manley.

Mr. and Mrs. W. F. Armstrong, of Saltcreek township, left today for Cridersville called there by the illness of his sister, Susanne Wolf.

S. C. Grant went to Columbus today to attend a meeting of the Ohio Builders' association, which is in session at the Deshler.

DEATH OF MRS. DONER.

Mrs. Sarah Doner, a former resident of Ashville, died at the home of her son, Elmer Doner, near St. Paul Monday afternoon. Th deceased was 82 years of age.

The funeral services will be held at St. Paul's church Wednesday afternoon at 1:30 o'clock. Interment in Reber Hill cemetery.

SEVENTEEN SMALLPOX CASES HERE

The city has now seventeen cases of smallpox. Two of these are very light mere eruptions of the skin, that sometimes follow vaccination. All cases are quarantined and cards are posted.

The new cases are John, Ruth and Katharine Sabine, of East High street; May Arledge, aged 36, of Maplewood avenue; Helen Cupp, aged 8, of Abernethy avenue; Mary Alice Strawser, aged 8, of East Mound street and Eugene, and Virginia Arledge of 317 East Main street.

Health Officer Schneider says the authorities have the situation well in hand and every case is watched closely and the quarantine barrier has not been broken by any of the small-pox victims.

ELBA DREW

Kind deeds performed 18 years ago have brought an estate estimated at more than \$10,000 to Elba Drew, thirty-five-year-old laborer of Kansas City, Mo. Drew, when a boy, took care of F. E. Forester of Goldfield, Nev., when the latter suffering from rheumatism, went to Excelsior Springs, a health resort near Kansas City, for treatment. Forester then was in meager circumstances.

THIRD DEATH

Cincinnati—A third death was added today to the toll taken in a smash-up here Monday night when an automobile skidded and plunged over a 10 foot embankment here.

William Hardin, 23, one of those seriously injured died. A fourth victim was expected to die.

Bud Ellis 22, and Burl Richards, 23 were killed instantly when the vehicle made the wild plunge.

SALEM UNION MEETING WITH MRS. HINTON

Miss Mary Porter Gave a Splendid Account of Convention in Detroit.

The regular monthly meeting of the Salem Woman's Christian Temperance Union was held Thursday afternoon, January 14, at the home of Mrs. Ed. Hinton. There was a good attendance and much interest manifested.

The meeting was opened by singing "America, the Beautiful" and responsive reading followed by prayer by Mrs. Anna Rice. The president, Miss Mary Harpster, had charge of the program arranged by Mrs. Viola D. Romans, state vice president to celebrate the memorable day, January 16, when national constitutional prohibition went into effect.

Following a business session the county vice president, Miss Mary Porter, delegate to the national W. C. T. U. convention in Detroit, gave a lengthy and very interesting report of the convention which was enjoyed by all. At the conclusion Miss Porter was given a rising vote of thanks for her excellent report.

The county president, Mrs. Lucy B. Price, was also present and gave a valuable and instructive talk on the plan of work for this year. The program closed with prayer by Mrs. Fisher.

A delightful social period followed during which the hostess served delicious refreshments.

The February meeting will be held at the home of Mrs. Nell Evans on West Pickaway street in Kingston, topic, "Frances E. Willard—Our Great Leader."

NEWS ABOUT COURT HOUSE

General Happenings Taken From the Records of the Various County Offices.

Will of W. T. Bell.

The will of the late William T. Bell has been probated.

The testator leaves all his household goods to his daughter, Mrs. Jennie S. Robinson. His other property is bequeathed to the following named persons: Joseph F. Bell, \$25; J. M. Bell, \$1,300; Anna F. Wilbur, \$1,300; N. H. Bell, \$1,300; Jennie S. Robinson, \$1,300; a gold watch was bequeathed to his grandson, Joseph Bell.

The Presbyterian church of this city, is given the sum of \$850, to be placed in the benevolent fund of the church.

The testator also gives the trustees of Forest cemetery the sum of \$150 for the care of the Bell lot and also the lot of Taylor Millar.

His sons, Joseph M. Bell and Ned H. Bell were named and appointed executors. The estate is estimated to be worth \$8,500.

The appraisers of the estate are H. B. Weaver, George F. Grand-Girard and Milt Morris. The will is dated August 20, 1920, and was witnessed by Milt Morris and H. B. Weaver.

Appointed Administrator.

Ernest C. Bartley has been appointed administrator of the estate of Elizabeth Bartley, deceased. The estate is estimated to be worth \$400. I. F. Snyder represents the administrator.

BEAUTY SHOPPE

Miss Margaret Davis, the Beauty Shoppe operator of the Crist Department store, has returned from a visit in Springfield.

EX-POLICE COMMISSIONER DUNDON DEAD

Columbus, Jan. 18.—Thomas J. Dundon, 71, retired lumberman, died yesterday at his home, 38 South Champion Ave., following three weeks' illness.

Mr. Dundon was born April 15, 1854, in Limerick County, Ireland, and was brought to Columbus by his parents. He received his education in the Columbus parochial schools, and from 1882 until 1886 served as police commissioner. In this capacity Mr. Dundon installed the present police and fire box system.

He was a member of St. Patrick's Church, where funeral services will be held at 9 a. m. Wednesday, with solemn requiem mass.

Many of Them, Brother

It's hard to gather a woman's meaning from her words, but nature has saved a few of them the trouble of making themselves plain.—Exchange.

Feed Mash to Balance Up the Scratch Feeds

Correct practice in feeding is the greatest factor that makes for success in the poultry business. One important practice that does not have so many followers as it deserves is the feeding of mash to balance up the scratch feeds which are usually grown at home.

Those who feed a mash in winter often quit feeding it as soon as the snow drifts melt away, for they think that when the hen can get out of doors she should be made to rustle for her living. It is a mistake to do away with the mash entirely. Even though it is offered to the hens they will not eat as much of it as they will in the winter, but they will have an opportunity of balancing up their ration. This is essential in order to get a large quantity of eggs.

During Rest Period Cow Should Be Fed Liberally

During the rest period the cow should be fed enough to get in extra good physical condition before she freshens. There is no necessity and surely no economy to feed heavily during the dry period. Two or three pounds a day may well be fed, largely ground oats and bran, with some cornmeal if the cow is thin, and a small proportion of oilmeal. Then give the cow silage and good legume hay, and not make her subsist on poor roughages like fodder and timothy hay. During the dry period is a good time also to keep up the feeding of minerals.

STATE BOUNDARY LINES AT FAULT

Errors Run From Hundreds of Acres to Many Square Miles.

Washington, D. C.—"Work recently begun to check up the condition of monuments marking the straight line boundary between New York and Pennsylvania, and to find how far the line varies from its proper position, brings to attention only one of the 'scores of boundary skeletons' in the national closet," says a bulletin from the Washington (D. C.) headquarters of the National Geographic society.

"It is probably safe to say that not one of the forty-eight states is now administering exactly the territory which supposedly belongs to it," continues the bulletin. "In some cases the differences are only matters of hundreds or thousands of acres, but in others they must be measured by hundreds of square miles. These faulty boundaries are for the most part accepted now, especially in the states longest settled; but the agreements have not all been reached quietly. There have been scores of disputes between neighboring states and territories, dozens of lawsuits have been brought before the Supreme court, and in one or two cases bitterness has been so great that civil war has seemed on the verge of breaking out."

"The chief difficulty is in drawing straight lines. Anyone can draw a straight line on a piece of paper. He can construct a reasonably straight edged flower bed or driveway. But try to lay out a straight line some miles or hundreds of miles long on the face of the earth, over hill and dale, valley and mountain, and you are faced by a vastly more difficult problem."

"Many of the 'supposedly east and west lines between the colonies, later inherited as boundaries by the states, were laid out with no other instrument than the magnetic compass. The direction in which the needle pointed varied as the surveyor advanced; but in some cases no account was taken of this, and in others inaccurate corrections were applied. The lines, instead of being straight and running in a true east and west direction, were traced somewhat like rail fences between their terminal points, or struck off from the true direction at an angle and had to be brought back at intervals by offsets."

"Plumb Lines Cause Errors. 'Later when better instruments, astronomical methods, and higher mathematics were used the errors in running boundary lines were greatly reduced. An absolutely accurate line hundreds of miles long through rough country has never yet been marked out on the earth's surface, however, and probably never will be—chiefly because surveying instruments depend on plumb line or spirit level to establish perpendiculars, and these indicators vary with differences in density of the rocks from place to place. The closest approach to accuracy has been made by the 'triangulation system,' which the United States coast and geodetic survey has extended over a great part of the United States. Errors still crop up, but they are almost negligible. It is this triangulation system which has disclosed many of the rather glaring inaccuracies of the earlier boundary surveys."

"A number of boundary difficulties have arisen because of mistakes in geography. Thus the first boundary treaty between Great Britain and the United States in 1782 provided that the northern boundary of the United States should run from Lake of the Woods 'on a due west course to the river Mississippi'—a physical impossibility. This error had to be adjusted later but the tiny projection of United States territory into Canada at the 95th meridian—like the sight on a rifle barrel—is a monument to the mistake."

"Another error that led to trouble was the belief that an east-west line through the southern extremity of Lake Michigan would cut Lake Erie at or north of the latter's western end. The extension of Indiana and Ohio several miles north of this old east-west line testifies to the correction that had to be made. The shifting of the Ohio line north, incidentally, was one of the boundary matters that came near causing civil war. Militia from both Ohio and Michigan were mobilized near the disputed territory in 1835 and bloodshed was avoided by the narrowest margin."

"One of the most peculiar state boundaries in the United States is the northern line of Delaware, which is the arc of a circle nicked out of the southeastern corner of Pennsylvania. Laying out the Delaware boundaries was a rather difficult problem in geometry and surveying combined. While the north line is an arc of a circle drawn from the center of the town of Newcastle with a twelve mile radius, the west line is in the main a tangent to the circle from the midpoint of a base line in the south between the Atlantic ocean and Chesapeake bay."

Spring Lamb Profitable

The spring lamb is the most profitable farm product farmers have been able to produce during the past few years. The spring lamb must be born early and fed well to make the most profit. Ewes should be bred within the next four weeks if one expects to make the most money out of spring lambs next year.

GLORIFY THE HOME!

The American home is a source of our present progress and prosperity.

When the home loses its influence, the nation is doomed.

When we fail to glorify the home, we then take the downward path.

The home should be given its due reverence.

Within its sacred precincts we find the foundation of everything that leads to worth-while achievements.

Therefore, let us exalt and sanctify the home!

It satisfies the deep-seated yearning that comes to every human soul. It brings peace, content and happiness.

God help those who have been denied the exalted privilege of home making!

They are to be pitied! And often they are the victims of misguided enthusiasts who have failed to grasp the fundamental principles of the great truths of life.

To possess something that is worth more than life itself should indeed be considered an inspiring privilege.

And where is there a mother or father who will not admit that he loves any one or all of his children more than life itself?

When an emergency arises wherein a parent can save a loved one by sacrificing his own life, a decision is quickly made in favor of his progeny.

"Glorify God in your bodies" is a Divine, Biblical command!

But many really religious people fail to catch the proper vision of the bodily needs. Consequently they are unfortunately minus the vitality essential in the building of family life, and sometimes they become obsessed with a wrong idea of the influence of bodily strength, vitality and beauty.

They are wont at times to criticize severely those who find inspiration in the sculptured outlines of bodily beauty.

Let us hope this sacrilegious attitude towards the body that was made in God's image will soon disappear. This disrespect cast upon the flesh and blood house in which we live is one of the principle causes of limited and the popularization of the frail physique which often brings sterility and at times physical, moral and spiritual disaster.

Nearly all criminals are defective physically. There are but few exceptions.

We hear so much at this time about the menace of the crime wave.

But back of all the evil forces that are referred to as the cause of the crime wave is the fast growing disrespect for the American home.

Marriages are decreasing; divorces are increasing.

A body that is 'glowing with health can never house the mind of a criminal.

And not until this great outstanding cause of criminality is fully recognized and properly remedied can we expect a satisfactory decrease in criminality.

The American home can be stabilized and perpetuated only by maintaining the vitality and vigor of our people.

To glorify the home we must first give due reverence to our glorious bodies. We must exalt and dignify them to the highest pinnacle of human thought.

The family life will be honored above everything.

Parents who fail in their family duties will then be properly stigmatized!

BERNARR MACFADDEN.

Toys for the Baby

The instinct of a baby is to put everything into its mouth. A mother should choose for it toys that are smooth, that can be easily washed and kept clean, toys without loose parts that may be detached and swallowed. Brightly painted toys should never be considered.

POULTRY FARM FOR SALE.

Three acre tract with dandy new 5 room bungalow, garage and poultry house, electric lights and gas, good walks. Well located in city limits. For further particulars and information, call or see

STEVENSON'S

Men, Not Women, Wed for Money, Judge Finds

Chicago.—Men, not women, compose a majority of the gold-digger class in Chicago, Judge Joseph Sabath, veteran jurist of the Superior court, declared at a luncheon in the Elks club. He has heard 15,000 divorce suits.

He said he had found that men, more often than women, marry with money in mind. "Women don't want alimony if they can help it," he asserted. Only about one woman in 500 asks for alimony when there are no children involved.

"Feminine gold-diggers usually marry old and wealthy men. In such a case I am in favor of the woman. It is a good lesson for the aged man who thinks he can get a young and lovely wife for nothing.

"The majority of women marry for love, but men in many cases think of the financial advantages."

Escaped by Camouflage

Matilda, daughter of Henry I of England used camouflage to escape from Oxford in 1141. Clothed in white, under cover of a heavy snowstorm, she passed unnoticed through the besieging army of King Stephen.

WOMEN WILL TAKE PART IN JACKSON DAY CELEBRATION

Chairman Harry D. Reichelderfer Names Chairman of Ladies' Committee Who Will Serve the Supper—High School Orchestra to Furnish Music—Get Tickets Now.

Harry D. Reichelderfer, chairman of the general committee in charge of the Jackson Day banquet to be held at the Memorial Hall on the evening of January 28th, has named Mrs. E. S. Stephens as chairman of the committee of twenty-five ladies who will serve the supper on that date, and are as follows:

Mrs. E. S. Stephens, chairman; Mrs. Charles Smith, Mrs. Senet Cryder, Mrs. Harvey Valentine, Mrs. E. E. Prose, Mrs. Ray Reid, Mrs. Ella Lindsey, Mrs. Robert J. Young, Mrs. Grace Goff, Mrs. John Bell, Mrs. Elliott Crites, Mrs. Albert Gaynes, Miss Mary Heffner, Miss Lucile Neuding, Miss Winifred Parrett, Misses Marie and Ruth Reichelderfer, Miss Alicia Rooney, Miss Evelyn Teegardin, Miss Martha Mary Jacobs, Misses Helen and Eleanor Snyder and Miss Ruth Young.

Many of our Democratic ladies have signified their intention of attending the banquet and for that reason Judge Florence Allen was prevailed upon to be with us and make an address. Her subject will be "Citizenship." Miss Allen will be in Cincinnati on the 28th in attendance at a meeting of the State Bar Association but will leave there in the afternoon for Chillicothe, where she will be met by a committee composed of Mrs. Bernard Young, and Mr. and Mrs. Clark K. Hunsicker and escorted to this city. Those who have never heard Miss Allen will miss a treat if they fail to hear her on this occasion.

Governor Donahey and C. C. Williams, who will also be on the program for addresses, will arrive in the city in the late afternoon and will be taken in charge by a committee to be named later.

Report from the rural districts, already received, indicate that the allotment of tickets will be disposed of by Saturday night.

Mrs. E. S. Neuding, of the general committee, reports that arrangements have been made whereby the Circleville High School Orchestra, under the leadership of Professor Zaenglein, will furnish the music for the occasion. Our school orchestra has the reputation of being the best of any town the size of Circleville, in Ohio, so those who enjoy good music with their banquet will not be disappointed.

Every little detail is being carefully carried out in order to make the banquet a success. No doubt the mingling together at this time, together with the truths of good old Democracy instilled into them by the speakers, will have a tendency to make each true Democrat vow anew to do his utmost for the furtherance of the principles of the party.

Judge I. N. Abernethy, who will act as toastmaster, is too well known in that capacity to need any introduction, suffice to say, he is sharpening up his wit to assist to make the evening a profitable and enjoyable one.

If you have not arranged for tickets do so at once, as accommodations are for 500 only.

Tickets can be secured from the chairman, Mr. Harry Reichelderfer, Mayor Fitzpatrick, at the Printery, any of the County offices, or at the office of The Circleville Herald.

Had Other Claims to Fame

Queen Boadicea, who lived in Britain about the middle of the First century, is said to have been the first prominent peroxide blond.

MILLIONS SAVED BY TRICK CAMERA

Remarkable Illusions Produced by Versatile Movie Engineers.

Hollywood.—The movie public has many illusions that are carefully created by trick photography and the versatility of engineers.

These secrets of the trade conserve millions of dollars annually in the budgets of producers. The directors point out, however, that they are not evolved to deceive the theatergoer, nor primarily with the idea of saving money; but often are necessary because it would be impossible to stage the actual scene demanded in the script.

In the photographic tricks the most indispensable perhaps is the "glass ceiling" illusion. This is a device of painted glass placed slightly above the camera lens. On the sheet of glass ceilings, domes or roofs are painted to correspond with the actual set.

Glass Work Necessary.

This glass work is necessary because of the lighting demanded by the camera. The roofs or upper parts of the set are not constructed. Instead strong flood lights are placed there.

Wrecks of ocean liners are enacted in a small tank in the studio. Howling gales are provided by mechanical wind machines. The "ocean" is lashed to fury by paddles, and the toy liner, perhaps ten inches in length, is tossed about on the waves by wires in the hands of studio assistants.

If the story calls for an explosion to sink the boat, a dynamite cap aboard is exploded at the proper time and the miniature craft sinks beneath the waves with exciting realism.

A recent example of miniature illusion was enacted in a picture of monstrous prehistoric beasts. On the screen they appeared to weigh tons and moved with lifelike ease. Before the camera they were models 18 inches high, composed of rubber and papier-mache, their movements manipulated by invisible wires.

Those Hair-Breadth Struggles.

When the movie spectator sees actors struggling perilously near the brink of a precipice or on the cornice of a tall building, he may be witnessing a scene "shot" in two different places. The fight may have taken place on the studio floor, and the camera man may later have photographed the precipice or roof corner on the same strip of film.

Fogs are formed in the studio by a huge atomizer, which feeds cold vapor on the scene through perforated pipes concealed about the set.

Adept with high explosives, the engineers set a blast to wreck a dam, releasing a rush of logs and water to destroy a populated valley. Or they burn an actress at the stake with so little harm that she may be the belle of a party the next evening.

One engineer has patented a powder that burns furiously on the furnishings of a luxurious apartment. When the cranking stops the furniture is found unharmed and is moved to the next "social" set.

Even Hollywood scarcely knows these technical men whose exploits make "the filming of the impossible."

Oats Require Good Soil for Best Crop

To Avoid Winter-Killing Sow Plenty of Seed.

Oats are used mainly for hay or grain, seldom being turned under. They should be sown on good land. On poor soils they do not give satisfactory returns in either hay or grain, and make less growth than rye for turning under.

"Yet oats make a fine crop for farmers," says E. C. Blair, extension agronomist at the North Carolina State college. "Under favorable conditions they may be expected to yield 2,500 to 3,500 pounds of cured hay per acre. The hay contains 9.3 per cent protein, as compared to 5.9 per cent for timothy and 15.4 per cent for soy beans. A strong point in favor of oats is that hairy vetch sown with them will mature at the same time, making a hay richer in protein than oats alone."

"Oats often winter-kill severely. The best way to avoid this is to sow plenty of seed. Use at least two bushels per acre, sow them early enough to get a good start before cold weather. The best time is October. A good way to sow is to disk the seed in, or better still, drill them in, after corn or soy beans. It would be too late to sow them after cotton. October-sown oats far outyield late fall or spring-sown oats in both hay and grain."

Mr. Blair suggests that if oats begin to run up in the fall they should be grazed down or cold weather will damage them. They may be grazed for a while in the spring, but care should be taken not to graze them too long.

Fertilizer experiments made in North Carolina show that oats respond well to nitrogen. However, if the land is fertile, or has received a good application of fertilizer in the spring, oats need not be fertilized in the fall. They may be given 100 pounds of nitrate of soda per acre early in the spring if they appear to need it.

Oat hay should be cut when the grains are in the dough stage, then it is easy to cure and excellent in quality.

Dockage consists of dirt, straw, sand, weed seeds, and chaff. Why pay freight rates on 4,398,000 pounds of dockage every fall?

Smutty wheat results in enormous losses in yields of wheat and in the value of the contaminated grain. The odor and color of the smutty grain render it inferior for milling.

Musty wheat is very objectionable because of the bad odor it gives the flour. Nearly 4 per cent of the wheat received at Kansas City is marked down on account of being sprouted.

High Living Is Bad

There is always some mortality among hens no matter how well they are cared for. It is probable that most of the deaths among hens are due to long confinement in good houses with rich rations, night feeding and lack of exercise. This condition tends to bring on liver trouble and other disorders. It is one of the penalties the poultryman must pay for getting a larger number of eggs. His problem is not to save a few weak sisters but to breed a race of hens that can stand the gaff.

Try us for a Want Add.

FOLLOW THE CROWD

Some firms advertise by mailing circulars. Pickaway County has about 5,000 homes. Circulars mailed to each home costs the sender about \$150.

Money spent in this manner must be added to the overhead expense and the customer pays that expense.

The Circleville Welding Co.'s policy has always been to reduce expense and give the customer the benefit of the saving. Having been in business for the past six years we need no introduction. All the leading industries of Circleville and the many surrounding towns have their work done here. Why not you. We don't do a cheap job merely to meet competition but do you a real 100 per cent job at a reasonable price as possible.

Welding and brazing is our business, nothing else. Bring your next job here and compare the difference in workmanship.

The time is passed when the measure of the value of a memorial is quantity. I hope the time has come when that measure is quality. I care not whether the material be marble or granite, its future will be measured by the character of the design. It is quality that has preserved for us the finest examples in painting and sculpture. It is quality that will stamp our imprint upon cemeteries of the future. Simplicity, correct lines and proportions and proper ornamentation are the real fundamentals. A design that is right, material that is lasting and perfect workmanship, spells success for the future of this industry and the beautification of the cemetery. Will you let me help you select the memorial for your lot. Call at show room. **NO AGENTS.**

Culling Poultry Flock Is Favored**Economical Plan to Eliminate Poor Layers and All Surplus Males.**

(Prepared by the United States Department of Agriculture.)

The most economical management of poultry requires that the flock be culled regularly to eliminate unprofitable birds. Poor layers and surplus males are a liability and should be disposed of. Weak and unhealthy birds should be killed and burned or buried deeply. There are several characteristics by which the poor layers may be distinguished. They almost invariably molt early and slowly, usually during August or September. The best time to weed out unprofitable hens is from about August 15 to about September 15. The better producers continue laying until late in the fall, and molt rapidly. Hens that have not

ored too much with black or horn color.

The vent of a hen that is laying heavily is large, expanded and moist, while that of a nonlayer is small, puckered and dry. In the case of the yellow-skinned breeds, the vent of a hen that is laying heavily is usually white or pink, but the vent of the non-layer is yellow.

When a hen is laying, the pelvic bones (the two pointed bones between which the vent is located) are rather thin, flexible, and spread well apart. When she is not laying, they are closer together, feel thicker, and are less flexible. The distance between the pelvic bones varies slightly in different breeds, it being usually 1½ inches or more for a laying hen and less than 1½ inches for nonlayer.

Abdomen of Layers.

The abdomen of the good layer is more expanded than that of the poor producer or nonlayer, since the egg-producing organs are larger and require more room. The abdomen of the laying hen is also flexible or soft because a smaller amount of fat is carried when laying, while the abdo-

Take Measurement to Determine if a Fowl Should Be Culled From Flock.

molted by August or September will show dirty, worn, or broken plumage, while those that have molted early show fresh, clean plumage or growing feathers at this time.

Poor Layers Marked.

There are other marks by which the poor layer may be picked out. The legs of hens that are naturally yellow in such breeds as Plymouth Rocks, Rhode Island Reds, Wyandottes and Leghorns are pale and faded in August and September if they have been laying heavily. If the legs are still yellow, the hen is almost certainly a poor layer. The same rule applies to breeds having yellow beaks, although the color fades more quickly from the beak than from the legs. The lower part of the beak bleaches more rapidly than the upper, and may be used as the guide when the upper half is colored too much with black or horn color.

men of the nonlayer is contracted, and harder and less pliable. The distance from the rear end of the breastbone to the pelvic bones also varies, according to the breed, from 2½ to 3 inches for the good layer. A smaller distance between these bones would indicate that the hen is not laying.

When a hen is laying or nearly ready to lay, her comb and wattles are plump and bright red in color. When she is not laying, her comb is shrunken, pale or dull in color, comparatively hard, and covered with whitish scales. A dark or bluish color usually indicates sickness.

The poultry raiser should not only cull the entire flock yearly, but should always be on the watch for birds that are sick or very thin in flesh, or that show signs of weakness or poor vitality. When such are discovered, they should be culled out immediately.

Fix Grades of Hay of Different Kinds**Government Favored Basis on Nutritive Values.**

Since the government recommended the establishment of grades of hay of different kinds on the basis of the nutritive values, hay is no longer just hay in the markets of the country.

The reasons for the grading of hay are just the same as those for the grading of any other commodity, says F. H. Steinmetz of the Minnesota agricultural experiment station staff, in charge of laboratory tests to aid in fixing hay grades.

Feed men wish to know how a shipment of hay is rated in order to be able to advertise and sell intelligently. Buyers wish to know what they are getting in kind, quality, and condition.

For example, alfalfa No. 1 is superior in feeding value and palatability to alfalfa No. 2. If a purchaser bought alfalfa No. 2 thinking it was No. 1, and there were no established grades, he would have no recourse. With grades established, however, he would have a chance to recover—if his purchase had been represented as No. 1 when it was really No. 2.

The same holds true as to prairie hays, among which grades have now been established.

The nutritive value of the hay itself, though, is not the only thing. Hay is frequently mixed with weeds and other foreign materials. Dealers and consumers should be able to know within reasonable limits how much such material any given lot contains. Weeds are objectionable because they are ordinarily unpalatable and cause mechanical waste, as animals will not sort out the good hay from the bad weeds. Moreover, there are some weeds which cause losses among live stock.

Hay grades are, therefore, highly desirable, says Mr. Steinmetz, and their use is to be encouraged in every way possible.

Fall Plowing Best

Early fall plowing is best, say farm crops division men of University Farm, St. Paul, Minn., because—

It gives a longer period for the decomposition of stubble and other vegetable matter turned over in plowing.

It opens the soil to the fall rains.

It helps to eradicate weeds which interfere with growth of crops.

It lessens the amount of spring work and permits of the prompt sowing of the crops in the spring.

It also lessens crowding and rushing times on the farm, and therefore is beneficial both to men and horses.

FARM FACTS

Infertile eggs from an incubator make good chick food.

Sudan grass is one of the best non-leguminous summer catch crops.

Legumes not only increase following crops, but provide an excellent feed in themselves.

In some cases the egg-eating hen can only be cured by a dose of iron—applied with the hatchet.

Plowing under a crop of hubam in the fall will add from 10 to 20 bushels per acre to the following corn crop.

Lice and mites are parasites which suck away poultry profits. It is a good investment of time and money to keep them in check.

Remember that a clean poultry house is desirable. Clean the droppings board once or twice a week. Oftener in warm or damp weather.

Vegetables which may be planted this month for fall or winter use are carrots, turnips, winter radishes, late cabbages, late peas, sweet corn and late cabbage.

CONFESSED TO POISONING OF HER HUSBAND**Mrs. Christy Denies That She Murdered Any of Her Eight Former Spouses.**

East Liverpool, O., Jan. 19 (UP)—Convinced that the woman has an insatiable mania for killing, authorities today impaneled a sanity commission to examine Mrs. Laura E. Christy, 48, who has confessed, according to police, that she murdered awo of her eight husbands.

Stubbornly defiant, Mrs. Christy, who admitted she gave poison capsules to her seventh husband and arsenic to her eighth, the Rev. William Christy, attache of the Christian Missionary Alliance, who died suddenly Wednesday, faced another barrage of questionnaires today.

Previously Mrs. Christy said she ministered arsenic to her pastor husband at his own request to relieve his indigestion.

The woman reiterated emphatically that she did not murder any of her other husbands.

Of the eight, only two are living, according to Brooks. These are Frederick Harmon, Athens, New York and Charles Graham, of East Liverpool, who has remarried and is residing here.

The husband who died besides Ebert and the Rev. Christy were Jacob Barnhart, Jesse Sears and George Holt, all of East Liverpool and Charles O'Neill, Cincinnati.

COMMISSIONERS**Met in Weekly Session and Approved Bills.**

The following bills were approved by the county commissioners in session Monday, January 18:

Leonard Morgan, truck driver.	\$ 19 02
Joseph Moats, truck driver.	19 20
Donald Hall, truck driver.	9 60
J. W. Trimmer, truck driver.	9 60
Shelby & McCrady, stove for garage.	5 00
The Standard Oil Co., gas for trucks.	9 20
Boyle & Johnson, premium on insurance.	4 80
Hummel & Plum, premium on insurance.	22 50
The Watchman, publishing notice.	10 80
American Express, freight.	35
Fitzpatrick's printery, stationery auditor.	54 00
Sanitary Supply Co., insecticide.	15 49
Barrere & Nickerson, supplies jail.	4 62
Fitzpatrick's printery, supplies for sheriff.	5 50
Dr. R. F. Lilly, dental service prisoners.	4 00

The Standard Oil Co., gas for sheriff.	1 89
Columbus Blank Co., paper for prosecuting attorney.	10 25
Ohio Law Reporter, subscription.	6 00
Martin studio, photo of jail and residence.	2 00

Love of Praise

In a word, we mean the gratification of our thirst for applause. That thirst, if the last infirmity of noble minds, is also the first infirmity of weak ones; and, on the whole, the strongest impulsive influence of average humanity: the greatest efforts of the race have always been traceable to the love of praise, as its greatest catastrophes to the love of pleasure.—Ruskin.

Hearsay Information

People in our town are not able to travel much, but are good listeners when anyone returns from a trip, and pick up about as much information as there is to be had. Likewise few of us are able to devote all our time to reading, but we have a few men who do, and they tell us what the books contain.—E. W. Howe's Monthly.

AMUSEMENTS

The Paramount picture, "The Coast of Folly," produced by Allan Dwan from the novel of the same name by Coningsby Dawson and starring Gloria Swanson at the Metropolitan theater this week, is what is described as a story "that is a warning for the girl who dares; an idyll for the girl who cares."

The picture brings Gloria to the screen in a story that is unlike "Madame Sans-Gene," her previous success, as day is from night. "The Coast of Folly" is laid against a background of Palm Beach and New York and offers the gorgeous Gloria her first dual role on the screen.

When Joyce Gathway is a little girl her mother runs off with a lover. Twenty years later, at Palm Beach, the celebrated "coast of folly" where so many lives, young and old, are wrecked upon the rocks of public opinion and the treacherous shoals of slander, Joyce Gathway, the very image of her mother, the infamous Nadine as she is termed, is the acknowledged leader of the younger set. She has inherited her father's immense fortune with but one provision and that a much discussed one, that in the event that she should ever become involved in any notoriety she automatically loses her fortune.

The gossips are chatting maliciously over her friendship with Larry Fay (Anthony Jowitt), the young husband of the notorious, cold and beautiful Mrs. Fay, played by Dorothy Cumming, who does not love her husband but who, on the other hand, hasn't the slightest intention of letting him—or rather his millions escape her. Larry finds in Joyce all the companionship and understanding that he is denied by his wife, while to him Joyce is her real self which the code of "the coast" and her set forbid her to be—a natural, loving and whole some girl.

Complications develop with such startling swiftness that Nadine, now ensconced as the wife of the Count de Tauro—and she's deeply in love with her husband, hastens to New York from France determined to save her daughter's name and, if possible, promote her happiness with Larry. She subtly contrives to place Mrs. Fay, the cause of all the rumpus, in a compromising position.

With the climax develops the situation and the scandal attached to it herself if she wants to clear Joyce. Doing this will cost her the love and respect of her titled husband. It takes but a moment for her to decide and with her decision the picture comes to a truly unusual and appealing close.

Lost Little Island

During heavy storms which swept across the world, a little island town in Portuguese West Africa completely disappeared beneath the sea.

*** ADVERTISED LETTERS ***

The following letters remained uncalled for in the Circleville, O., postoffice for the week ending Monday, January 18, 1926.

Male

Cotton John W.
Hedges, Vinton.
Hudson, D. H.
Large Eugene.

Female

Bailey, Mrs. Helen.
Waidelich, Miss Pearl.

In calling for advertised letters applicants are requested to ask for letters for above date.

GEO. P. FORESMAN, P. M.

FRANKLIN'S OWN EPITAPH

GIVEN TO THE PUBLIC.
Benjamin Franklin's original epitaph, kept hidden in the collection of a Chicago business man since its discovery 20 years ago has been made public.

Inscription differs in only a few words and punctuation marks from the widely known epitaph of "Poor Richard." It follows:

"The body of B. Franklin, printer, like the cover of an old book, its contents torn out, and strip of its lettering and gilding, lies here for worms. But the work shall not be wholly lost. For it will, as he believed, appear, once more in a new and more perfect edition, corrected and amended. —By the Author.

Ancient Dicing Games

The invention of dice is mythically ascribed to Palamedes of Greece about the year 1241 B. C. The game of tall among the Romans was played with dice. The early English antiquary, Stow, mentions two entertainments given by the city of London at which dice were played.

BIRTHS

To Mr. and Mrs. S. T. Hosler, of 140 Walnut street, Tuesday, January 19, at the Lancaster City hospital, a son.

COAL! COAL! COAL!

SOCIAL CALENDAR

Mr. Willis Lockard was the honor guest at a surprise dinner given by his wife and son, Johnny, Sunday. The following guests were present: Mrs. Etta Dick and family, of Columbus; Mr. and Mrs. Roy Weise and Blanche Hery, of South Vienna; Mrs. Delmar Hardin of London; Mr. and Mrs. Harold Lockard and daughter, Kathryn, of Circleville; Mr. and Mrs. Alonzo Stonerock of Williamsport; John Dean of Fox; Mr. and Mrs. Henry Wrightsel, of Derby; Mr. and Mrs. Samuel Lockard of Bethlehem, Pennsylvania; Mr. and Mrs. Noah Wrightsel of Orient. At the noon hour a good dinner was served and all present did ample justice to the good things to eat. The day was spent in social conversation and violin and victrola music. All departed late in the evening wishing Mr. Lockard many more happy birthdays.

WLS, Chicago 345 11 p. m. CST—WLS Circus.

WSAI, Cincinnati, 326 10:15 p. m. CST—WSAI—String quartet.

KGW Portland 492 8 p. m. PCST—Seventh Infantry band.

River Changed Course

The Hoang river in China burst its banks in 1851 and changed its course so as to flow into the Gulf of Pechee-lee. Within two years its mouth had shifted 250 miles from its original position.

First Royal Astronomer

John Flamsteed, famous astronomer, was the first royal astronomer of England. He was appointed to that office March 4, 1675. He was a bitter enemy of Newton, because Newton tried to give him necessary advice.

Public Sale

Owing to the death of my wife, I will sell at public auction five miles north of Circleville, four miles south of Ashville, two miles east of Haggerty Station, on the Walnut Creek road,

THURSDAY, FEBRUARY 11, 1926

the following property, to-wit:

5 HEAD OF HORSES 5

One black mare, 8 years old, weight 1700 pounds; 1 black mare, 8 years old, weight 1550 pounds; 1 iron gray mare 5 years old, weight 1500 pounds; 1 white horse, 15 years old, weight 1400 pounds; 1 gray horse, blind, 16 years old, weight 1400 pounds.

12 HEAD CATTLE 12

One purebred Guernsey cow, two years old, test, 4; 1 Jersey cow, 5 years old, milk test, 5.5; 1 purebred Guernsey cow 2 years old, milk test, 5.7; 1 purebred Jersey cow, 6 years old, milk test, 5.3; 1 half Jersey, half Shorthorn cow 4 years old, milk test, 5.4; 1 red cow, 8 years old, milk test, 3.8. Above cows are all giving good flow of milk and are due to freshen first of August.

One roan cow, 8 years old, milk test, 5.2, will freshen last of March; 1 red cow, 7 years old, milk test, 5, will freshen last of March; 1 half Jersey, half Guernsey heifer, bred—an extra good one; 3 good heifer calves, 6 months old.

HARNESS

Tug harness for 5 horses, hitch straps, collars and fly nets.

FARM IMPLEMENTS

One Deering binder, 7-foot cut, good condition; 1 Deering mower, 5 foot cut; 1 Superior 12x7 grain drill, good as new; 1 Hays corn planter, 80 rods of wire, 2 double disc harrows, 1 spring tooth harrow, 1 lever harrow, 1 land drag, 1 gearless hay loader, 1 hay tedder, 1 wooden rake 1 steel land roller, 1 Litchfield manure spreader, 1 International two row cultivator, 1 Janesville riding cultivator, 1 Pilot disc cultivator, 1 Brown walking cultivator, 2 2 pair disc vine cutters, 1 J. I. Case, 14 inch sulky plow, 1 405 Oliver breaking plow, 1—404 Oliver breaking plow, 1 single shovel plow, 1 double shovel plow, 1 Milburn bed wagon, 1 Studebaker bed wagon, 1 truck wagon, with platform hay ladder, 1 corn sheller, 1 clover buncher, 1 gravel bed, 1 feed sled, 1 water tank, 1 automatic hog waterer, 1 tank heater, 1 pump and 18 feet pipe, 3 A-hog houses, two 10x16 hog houses, 20 panels for hog pens, hog troughs, 150 pounds U. S. Hog Tonic, 40 rods 36 inch hog fence, 40 rods new 48 inch fence, 160 rods barb wire, 10 rods 58 inch poultry wire, 1 Never Freeze poultry fountain, about 50 wood posts, 5 log chains, 6 oil drums, 1 new 5 gallon gasoline can, 1 hay fork, hay track, 100 feet 3/4 inch rope and lot of pulleys 1 block and tackle with 75 feet 3/4 inch rope, 100 feet new 3/4 inch rope, pitchforks and doubletrees, 1 steel vise, 1 screw jack, new ditch grader, spades, shovels, saws, axes, scoops, scoop fork, and lot of other tools too numerous to mention, 1 Iowa cream separator, 2 new 10 gallon cream cans, three 5 gallon cream cans, 1 iron kettle and ring, 1 copper kettle, 1 lard press, 1 sausage grinder, several good lard cans, 1 lawn mower, 1 step ladder, 2 farm gates, washing machine, wringer bench and wringer, wash tubs, boiler, 1 two-horsepower gas engine, pump jack and belt, 1 Fordson tractor in perfect condition, 1 set 12 inch extension rims and clamps for tractor, 1 Oliver 12 inch tractor plow, 2 pair new steel shares, 1 1918 model Ford roadster with pickup body, in good running order, about 5 tons mixed hay in mow, 5 bushels clover seed, 25 bushels Carmen potatoes and 300 bushels of oats.

HOUSEHOLD GOODS

One Monarch range, good as new; 1 large size Round Oak heating stove, 1 three burner oil stove, 2 kitchen cupboards, 3 washstands, 1 kitchen cabinet, 19 good kitchen and dining chairs, 1 child's high chair, 2 extension dining tables, 1 drop-leaf table, 1 kitchen table, 26 sq. yds. linoleum, never used; 1 buffet, 1 couch, 1 new davenport, 2 new leather rocking chairs, 2 oak rockers, 1 settee, 2 dressers, 3 bedsteads, springs, 1 pair of bed springs, never used; five 9x12 rugs, 20 yards new rug border, 40 yards matting, 1 new gasoline lamp, lot of good china, silver, glassware, complete line of kitchen and cooking utensils, Pyrex baking dishes, practically all cooking utensils are of the best grade aluminum, lot of window blinds, curtains, table linen and lot of other household goods.

CANNED FRUIT

About 200 quarts canned fruits, consisting of peaches, pears, plums, pineapples, blackberries, gooseberries, strawberries, tomatoes, cherries, pickles and lot of jellies.

Sale to commence promptly at 10 o'clock. Please come early, as we have a lot to sell.

Terms Made Known On Day Of Sale.

C. G. Chalfin, Auc't.

J. D. Hummel, Clerk.

Ladies of Evangelical church will serve dinner

Plenty of heat in case of cold weather.

Raccoon Collar, Large Buttons on Sports Coat

Plain but handsome imported mixtures make popular sports coats for the season. This smart model has flaring plaits below the knees, which is a new note in coat fashions. The collar of raccoon and the large buttons add to the beauty of the garment.

Accessories That Are Dear to Young Misses

Girls who pride themselves on being well dressed will need no caution about selecting the right hose, bags, gloves and incidentals, because they know that they are judged by just these little but important things. It is good training for any youngster to be given the best accessories that her family can afford and then be taught the care of them, because in this way she learns to appreciate nice things.

For school she will want one of the new bulky leather purses that have the magical "zipper" closing. They are smart and practical and especially attractive in bright colors suitable to the young girl. Another good purse is of lizard or crocodile and exactly matches the shoes. Incidentally, this matching of purse and shoes is becoming a very important style note.

There are some very amusing "hankies" which a girl with any claim to chic will certainly want to carry. They are bright small silk squares that show a large, bold head of a clown or lady or grotesque animal. They are done in vivid colors resembling the design used by the Balkan peasants. They are very gay little things and give just the proper dash to a subdued and dignified costume.

Youngsters love ornaments of every description, and it is here that great care is needed to prevent a girl from overloading herself by wearing all her pretty baubles at the same time. She must be taught what not to wear in addition to what to wear and when to wear it. It is wise to select whatever inexpensive jewelry and ornaments are to be worn with each costume and then emphasize the fact that these details are part of the costume which they supplement.

Furs for Trimming May Be Found in All Widths

Those who care only for natural furs undyed will find them in all widths.

Among the new handlings one finds a plucked muskrat which feels just like Hudson seal and looks like beaver, but a little more gold in color. It is dyed in this lovely blond color. Another surprise is a moulton dyed in a little deeper shade—a very much glorified moulton, which the buyer said would not get a curled, knotty appearance if it were kept combed and brushed.

This moulton looks very much like a soft brown fox, but is much less expensive.

Light gray thibet looks like caracul, but it is less wavy and less expensive. Chinchilla is imitated more successfully this year than it has ever been, and even the little chipmunk has been imitated, but not as well as some other furs. Rabbit and cat fur still arrive under the rabbit's French name, lapin.

Embroideries for trimming come in handings by the yard, some of them so put together that they may be cut into motifs and applied in the effort to save the time and labor on hand embroideries in color. It takes a master hand to make this applique successful. A few hand stitches must be added to keep the edges from looking chopped off. The difficulty of matching the silks used would alone discourage many persons. But if one can be satisfied to make her edges, her seams, her hems look like those of the professional, she can often use buttons to cover up other defects and to give a finished air to her little home-made frock without the labor entailed by another finish.

Rye Pasture for Hogs

Rye makes a splendid fall, winter and early spring pasture for hogs of all kinds. Fall pigs that have access to rye pasture during the winter make much better use of other feeds than pigs that do not have access to it. Brood sows that have access to rye pasture during the winter farrow stronger and thriftier pigs. Rye should be planted for pasture as early as moisture conditions will permit.

Family wash at very reasonable prices. Inquire at Barnhill Cleaning And Laundry. We use soft water

His Part in Procession

You know how the Rotarians do at their dinners, when they stand up and tell in what business they are engaged. George Marble tells of an undertaker, when called on at one of these meetings who rose and said, "I follow the medical profession."—Cap-per's Weekly.

Tobacco-Stained Teeth

To remove tobacco stains from the teeth place a small amount of fluoride of ammonia on a piece of absorbent cotton and allow it to remain on the teeth for about a minute. Care should be taken not to let this touch the gums or get into the throat. After the cotton is taken off, the mouth should be rinsed with cold water.

Knew Ground Thoroughly

Gen. Lew Wallace visited the Holy land many years after he wrote "Ben-Hur." So extensive had been his studies that he afterward said that he did not find a single error in his record.

Temple Cut Out of Rock

Ellora, British India, contains a unique temple cut entirely out of rock, both inside and outside. It is about eighty feet high, and is elaborately carved. It was made before the year 1000 A. D.

FARM NOTES

Fresh manure may be spread on the garden in the fall.

Think of weeds as leaks swiftly depleting the water supply. But don't just think.

Last call for the cull hens. After September 15 it is difficult to pick the poor ones.

The best way of pasturing soy beans with hogs is to grow the beans with corn and then hog the combination down.

It costs just as much to raise a 40-bushel crop as one that yields 50 bushels, so why not plant your farm to adapted varieties?

Limberneck Is Result of Ptomaine Poisoning

Limberneck or blind staggers, as it is sometimes known in some localities, may be the result of ptomaine poisoning caused by eating some rancid food which, in the case of poultry, generally means decayed meat. It may, however, mean moldy grains. Sometimes it comes about merely by acute indigestion caused by clogging the system in some way, possibly by feeding too much fiber such as is found in the hulls of oats, barley, etc., or allowing them to eat dried, tough grass.

The thing to do is to starve the birds for a day or so to get the crops empty and then give each one a teaspoonful or two of olive oil and empty the crop. Give the fowl in the meantime access to nothing but sand or grit and water. Then feed some easily digestible, highly nutritious feed, such as bits of raw meat that have been slightly broiled; or, if the fowl can handle it, stale, dried bread soaked in sweet milk.

County Record for Use of Pure Breds

All Classes of Live Stock In- cluded in List.

(Prepared by the United States Department of Agriculture.)

With 592 live stock owners officially enrolled with the United States Department of Agriculture as pure-bred sire users, Pulaski county, Va., is the premier county of the United States in the extensive use of pure-bred males in live-stock breeding operations, so far as the department's records show. A recent report of the bureau of animal industry of the department notes that Pulaski county contains 843 farms reporting live stock, according to the last census, making pure-bred sire users about 70 per cent of the total. The figure applies to live stock owners who use such sires for all classes of live stock raised, including cattle, horses, swine, sheep, and poultry. The census reports 970 inclosures, not farms, which would lower the percentage considerably, but would still permit the county to hold its premier position with respect to the wide use of pure-bred sires.

Union county, Ky., is the only serious competitor of Pulaski county. The figures given have added significance when considered in the light of reports which the department receives frequently on the benefits derived from the breeding of improved stock. From a financial point of view the widespread use of pure-bred sires may be expected to bring fully \$100,000 additional returns to the farmers of a good live stock county. This estimate is based on calculations from county agent sources and is believed to be conservative. The bureau of animal industry has consistently urged the use of good pure-bred sires as a sound and practical method of live stock improvement. Responses from stock owners who have adopted the method have shown general satisfaction with the results.

Silage From Immature Corn Good for Cattle

Immature corn can be made into a good feed for cattle by putting it into a silo, says J. B. Fitch, head of the dairy department of the Kansas State Agricultural college. Many silos were built this year to store the short corn crop. If above ground silos are not available and their purchase cannot be financed, pit silos, trench silos and silos made from flooring or other home-made silos can be used, according to Fitch.

"When this corn has reached the point where it will not grow any more it should be cut and put into a silo or stacked," he advises. "If it is allowed to stand in the field the leaves will shatter off and the crop deteriorate quite rapidly when exposed to the weather."

"Immature corn is being cut this year with headers, grain binders, and mowing machines. When put into the silo the crop can be handled about the same as any other silage crop with the exception that this material cannot take up as much moisture as it would if mature. The amount of water added there should be watched carefully."

"Silage from immature corn will not be equal in feed value to good corn silage, but the silo is a means of preserving this corn and changing it to a palatable feed without loss."

Soy Beans for Pasture

Soy beans can be pastured by any kind of live stock, but they are more especially adapted to hogs than to cattle. For cattle our advice would be to harvest the beans and make hay. If desirable the beans can be permitted to ripen and be harvested for the seed and the straw fed to cattle, it having a higher feeding value than corn stover. The soy-bean seed can be ground and fed to cows in the place of cotton-seed meal.

FARM FACTS

Remove brush and weeds from fence corners and ditches.

Quality, not quantity, is the important consideration in dairy farming.

Acid phosphate applied at the rate of 150 pounds per acre just before seeding will pay big returns.

To adjust production to the demands of the market is the pertinent problem of farm management.

A dozen horseshoes over the door won't prevent the "bad luck" that comes from not keeping apace with better farm practices.

Can eggs while they are cheap, making it possible to sell the fresh winter eggs at a time when they bring the highest price.

Soy beans containing between 30 and 40 per cent of dry matter when put into the silo keep well and show no greater loss of nutrients than does corn.

Cows that produce less than 9,000 pounds of milk and 325 pounds of butterfat a year are hardly worth keeping. Ohio cow-testing association records indicate.

Cowpea silage is somewhat more difficult to make than silage from other leguminous crops. Unless the dry matter content is fairly high the silage will be bitter and unpalatable.

My Favorite Stories

By IRVIN S. COBB

Where Higher Education Would Have Landed Him

Some fifteen years ago there landed in New York a friendless and almost penniless Russian immigrant who found lodgings on the East side, and at once, with racial perseverance and energy, set out to earn a living.

He was of a likeable disposition, and speedily made acquaintances who sought to aid him in his ambition. One of them sponsored him for the vacant post of janitor, or shammos, to use the common Hebrew word, of a small synagogue on a side street.

But when the officers of the congregation found out the applicant was entirely illiterate they reluctantly denied him employment, inasmuch as a shammos must keep certain records. The greenhorn quickly rallied from his disappointment. He got a job somewhere. He prospered. Presently he became a dabbler in real estate.

Within ten years he was one of the largest independent operators in East side tenement-house property and popularly rated as a millionaire. An occasion arose when he needed a large amount of money to swing what promised to be a profitable deal. Finding himself for the moment short of cash he went to the East side branch of one of the large banks.

It was the first time in his entire business career that he had found it necessary to borrow extensively. He explained his position to the manager, who knew of his success, and asked for a loan of fifty thousand dollars.

"I'll be very glad to accommodate you, Mr. Rabin," said the banker. "Just sit down there at that desk and make out a note for the amount."

The caller smiled an embarrassed smile.

"If you please," he said, "you should be so good as to make out the note and then I should sign it."

"What's the idea?" inquired the bank manager puzzled.

"Well, you see," he confessed, "I had to tell you something; Myself, I cannot read and write. My wife has taught me how to make my own name on paper, but otherwise with me reading and writing is nix."

In amazement the banker stared at him.

"Well, well, well!" he murmured admiringly. "And yet, handicapped as you've been, inside of a few years you have become a rich man! I wonder what you'd have been in this country by now if only you had been able to read and write?"

"A shammos," said Mr. Rabin modestly.

LIABILITY INSURANCE

What It Is and the Benefits That Accrue to the
Policy Holders.

I wonder if you realize that every car owner is responsible to the public for the operation of his car, whether he drives it himself or allows others to drive it.

PUBLIC LIABILITY is an insurance term indicating the responsibility the car owner is under for injuries or death inflicted on persons thru the operation of his car.

It is most important of all automobile insurance features, owing to the unknown possibilities of the claims.

Some of the factors making accidents and consequent liability claims daily more numerous, and the owner's risk in operating a car an ever increasing one, are:

CONGESTION OF TRAFFIC. Roads are about the same width as formerly, yet traffic thereon has greatly increased. Between fifteen and twenty million motor vehicles are registered in the United States today. This vast number is being increased daily.

LOW PRICES OF SECOND-HAND CARS have added greatly to the number of irresponsible drivers, who menace all other users of the roads. The careful, sane driver is often the sufferer from the faults of others. IMPROVED HIGHWAYS are a constant temptation to speedsters and encourage less careful attention on the part of all drivers.

THE CHILDREN MUST PLAY, and there being very little yard space around the average city home, the playing is done in the path of the motorists. The heavy tolls of 1924 in life, injuries and property losses have been given wide publicity in the press of the country.

AMBULANCE-CHASING LAWYERS (and there is one or more in every city) make a business of creating cases against any car owner involved in an accident, whether or not it is serious, whether or not he is liable and particularly if he has property.

COURT CHARGES AND ATTORNEY'S FEES MUST BE PAID, and eventually, possibly a heavy judgment to be paid with interest and costs. The feelings, sympathies and judgments of juries are generally in favor of the injured and against the car owner. Verdicts for injuries or death run into thousands of dollars, and are larger than ever before. Even if you win, your expenses mount to a large figure.

An automobile liability insurance guarantees the investigation of claims whether you are liable or not, adjusts, pays, fights your case if necessary, pays expenses, lawyer's fees and court costs, relieves you from responsibility and worry. It does all of this for the owner and for any one legally operating the car with the owner's permission.

If you are now carrying liability insurance, the above facts will serve to strengthen the conviction that led you to protect yourself.

This information, coupled with the fact that last year no fewer than twenty-eight states introduced bills for compulsory liability insurance, is conclusive evidence of the advisability of every car owner relieving himself of personal liability.

HUGE TANK
EXPLODES

Gauger Injured, Probably Fatal-
ly—Damage Reaches
\$200,000.

El Segundo, Calif., Jan. 16.—One man was injured, it is believed fatally, and property damages estimated at \$200,000 was caused when an 80,000-gallon tank of distillate exploded at the Standard Oil Company refinery here today.

Alfred Collier, 19 years old, of Inglewood, a gauger, was working on top of the tank when it exploded. The cap of the huge tank blew off, carrying Collier a distance of more than 100 feet.

The heavy steel tank was melted almost to the ground. Firemen from El Segundo joined the oil company squad and quickly had the flames under control to protect the near-by tanks.

Sell Old Fowls in Fall
to Save Winter Feeding

A good many people are adopting the idea of selling the old hens in the fall of the year after they quit laying. This saves keeping them through the winter. Besides the pullets are the best winter layers. Keeping the old hens only adds to the expense without increasing the returns proportionately. The principal advantage in keeping the old hens over is to have enough of them to lay the eggs which are necessary for hatching. If only pullets are kept over the hatch may be disappointing.

People who follow the practice of buying baby chicks every spring should keep only pullets. These people can sell off the cockerels as soon as they are marketable. In this way they can keep their flock working at the highest possible rate of speed.

Possession given as soon as deal is made.

100 acre farm, good 2 story frame dwelling, good barn, poultry house, corncrib and other good buildings, well tiled and fenced, all tillable, close to school and market \$12,000. Possession given March 1, 1926 with terms to suit purchaser.

208 acre tract, 6 room frame dwelling, good 8 horse frame barn 4 car garage, steel corn crib, granary, two wind pumps and engine well tiled and fenced, good black soil, all tillable, located near a good market, \$135 per acre

JOHN W. LANGLEY

Begins Sentence—Former Ken-
tucky Congressman Enters
Atlanta Penitentiary.

Atlanta, Ga., Jan. 16.—John W. Langley, for 20 years Congressman from Kentucky, entered the Atlanta Federal Penitentiary here today to begin serving a two-year sentence imposed on conviction of conspiracy to violate the national prohibition law.

Stating that he was suffering from high blood pressure and from a tremendous mental strain, he had to be assisted up the long steps of the railway station. He chatted for a few minutes with newspaper men and posed for photographers.

"I am going to make a model prisoner," Langley stated, "and I am confident that the public eventually will realize my innocence."

Langley was convicted two years ago with two other men of conspiracy to remove 1,200 cases of liquor from the Belle of Anderson distillery in Kentucky. The case was appealed to the Supreme Court, which refused to review the case, and he resigned from Congress and asked his constituents to elect his wife to succeed him. The date for the election has not yet been set.

KEEPING WELL

LIME BURNS THE EYE

DR. FREDERICK R. GREEN
Editor of "HEALTH"

THE eye is one of the most sensitive organs of the body. Everyone knows how painful a speck of dust or a grain of sand in the eye can be. Any foreign body in the eye causes irritation, pain and congestion. When the foreign substance also causes burning of the eyeball, it is not only painful but dangerous to the eye and the eyesight.

One of the most dangerous substances which can get into the eye is quicklime. Such accidents are not uncommon among bricklayers, plasterers and others who handle this dangerous substance.

As Ramsay, a recognized authority says, "In case of quicklime, the severity of the burn is due to the fact that the lime usually remains for a considerable period in contact with the tissues and its powerful escharotic action has time to take effect. The slightest particle of it, entering the eye, gives rise to the most intense irritation, leading to spasmodic closure of the eyelids and the copious secretion of tears, a combination of circumstances which is most favorable in ordinary cases for the expulsion of a foreign body, but, which in the case of lime is most unfortunate, because by the firm closure of the eyelids the lime is pressed against the eyeball, while the tears, which ordinarily wash out any foreign body, slack the lime, producing heat which increases the destruction of the eyeball. The lime, in burning leaves a crust on the eyeball made up of calcium carbonate, an insoluble opaque substance, which prevents the light from passing through the cornea and so interferes with vision."

In some cases in which small pieces of lime have gotten into the eye, vision has only been partially affected but, if any large amount of lime has come in contact with the eyeball, the result may be nearly complete loss of vision or even total blindness. Loss of sight is a serious misfortune to anyone, but to a working man it is a calamity and may convert an able-bodied tradesman into a dependent pauper.

The treatment of lime burns consists in the removal of the lime as soon as possible. This is best done by a stream of cold water. Many solutions have been used to neutralize and dissolve the lime. Milk, olive oil, sugar solutions and other substances have been tried with but little success. The best results have been gotten from neutral solutions of ammonium chloride. This substance neutralizes the lime, forming a soluble crust which can be dissolved and washed out. In order to do this properly, however, the eye must first be deadened by a cocaine solution and the ammonium chloride must be freshly prepared. This makes it necessary for such treatment to be carried out by an experienced oculist.

In all cases of lime burns of the eye, the eye should be immediately washed out with cold water and the patient should be sent at once to a competent specialist. Such treatment may save the eyesight and prevent the victim from being crippled for life.

Sociability

Luncher (to a man who is making off with his overcoat)—I beg your pardon, sir, but in case we don't meet again, may I have a couple of cigars out of the pocket?—Dartmouth Jack o' Lantern.

YOUNG MEN SEEK
HELPFUL WIVES

Are Advised by Betty Fairfax to
Select Girl Who Is Wise
Enough To Dress Ample In
Winter, Assuring Herself a
Life of Good Health—Must
Know Value of Money.
By Betty Fairfax.

Three young men wrote me a joint letter in which they asked me to advise them of the type of girl who will make the best wife. They say they earn good wages, and have steady work. They can pay down a nice sum for a home, and finish by monthly payments. So they want the kind of girl who will be helpful in getting a home and keeping it.

First I want to say that there are several things necessary besides love in marriage. That comes first, if it is the right kind; next is good health. I am sorry for any man who is handicapped with a delicate wife, and in the first place it is not necessary for so many women to be delicate. They make themselves that way.

If I were a young man, I would never marry a girl who goes around in winter wearing silk stockings and satin or velvet shoes out-of-doors. Every day I see business girls on the streets in rain, or snow and mud, with their feet and legs encased just that way. Some of the stockings are the veriest chiffon, and one has to look twice to see whether the girl is wearing stockings at all. No overshoes are worn, and feet get wet.

As sure as fate a girl who goes on the streets that way will grow into a delicate woman before she is 30 years old, unless she dies of tuberculosis before that. It is absolutely necessary to keep the feet and legs warm, if a girl is to be comfortable, and if she becomes chilled, she is sure to be affected by that.

So my advice to a young man is to see that the girl he is thinking of marrying is healthy and wears sensible clothes. If she isn't, let her pass by. He wants a beautiful wife, but beauty does not last long, and good health does.

Then I advise that these young men, readers find a girl who knows the value of money. If they have not been employed commercially, they can learn to handle their allowance at home economically. America's wealthiest men always make a very small allowance on one garment, they must wait until the next month for more. That is the best lesson in the world for young people.

So to my young men who asked the question, I will say these three things are necessary to a happy marriage—love, health and economy, and the greatest of these is health.

TRY US FOR A WANT AD

Pigs Quite Susceptible
to Cocklebur Poisoning

The common cocklebur or clotbur has long been suspected of being poisonous but now its toxicity has been definitely established. Cattle are occasionally poisoned, but young pigs are most susceptible. The burrs may produce mechanical injury but this is of secondary importance. Only young plants in the cotyledon stage are dangerous. The mortality from cockleburs is not high for the reason that, while they are widely distributed, they are seldom eaten. Pigs that have been fed milk cannot be killed with cockleburs experimentally. This suggests that probably the best treatment for acute cases is the administration of fats and oils, such as milk, bacon, grease, and linseed oil.—George H. Glover, Colorado Agricultural college.

Repair Laying House

This is a good time to repair the laying house before the fall cleaning and preparation for early pullets. Roofs may need patching. Knot holes should be filled or covered, putty renewed on window sashes, new curtains put in for old ones, and door hinges tightened. Perhaps a coat or two of paint over the entire building would help both the appearance and preservation of the structure.

Irish Fantasy

A leprechaun is a pygmy sprite, according to Irish superstition. He is described as a manikin less than two feet high, dressed in a cocked hat, faced coat, knee breeches and silver-buckled shoes. Leprechauns were generally masters of magic.

A Personal Matter

By H. IRVING KING

(Copyright.)

AFTER she had mailed the letter Louisa was alarmed over what she had done. Never before in her whole placid and guarded life, had she so broken over the bounds of the conventionalities. But the little town in which she lived was prosaic.

So when one day she saw in the "personal column" of a New York paper which had strayed her way an advertisement stating that a "Respectable young man," who was lonely in the great city, would like to correspond with a young lady who was lonely in the country with the idea of a mutual cheering up, she answered it. It seemed to fit her case. She did not sign her real name, of course. She thought Eleanor Fitzallen sounded more romantic. She told them at the post office—Louisa always went for the family mail—to put any letters for "Miss Fitzallen" in her box. She was a cousin of hers whom she was expecting on a visit.

The family consisted of Louisa, her mother and a small brother—who was on no account allowed to get the mail, for he was apt to lose the letters. And her mother never took the trouble to stop for the mail. The lonely young man in the city gave his name in the "personal" as George Blakesley and his address as "general delivery." So there was not much clew to him. Louisa's letter to George was very proper and impersonal. Really she had written it largely out of curiosity as to just what sort of a reply she would get.

To her great surprise the unknown George wrote back a missive as proper as her own, couched in rather stilted language and betraying evidences of bashfulness. This from a young man who had advertised for a young lady to correspond with! "Well," thought Louisa, "for once in my life the unexpected has happened." And after a proper interval she wrote the young man again. And thus there grew up a very proper and exceedingly friendly correspondence. Finally George, the unknown, asked Louisa for her photograph. The wicked girl sent him the picture of a third cousin of hers which she happened to have by her.

Then she became alarmed and resolved to drop the whole business. She realized that she was getting rather fond of George—and she did not know who George was or anything about him. And she never could know—never wanted to know—for if he was the sort of young man he appeared to be from his letters she would be consumed with shame to meet him, or have him know that she, Louisa Trafford, had answered a "personal" in the paper and carried on a correspondence with a man to whom she had never been introduced. George wrote twice beseeching a continuance of the interchange of letters but received no reply.

But how Louisa did miss that correspondence! She blushed as she acknowledged to herself that she had never enjoyed anything so much in her life. She grew moody and restless and told her mother that she really must have a change. So she went to visit her Uncle Roger in Newark. He had several daughters who had lots of company—many young men among them—and, sad to say, in this new and more lively environment Louisa almost forgot about the lonely George. Still his letters remained to her a part of some pleasant dream she had once had. Uncle Roger's wife was a great matchmaker and set about picking out a suitable husband for Louisa immediately.

Mrs. Roger pitched upon Claude Lambton as the one to marry her niece. He was a lively young man, fond of yachting and golfing, and his father was said to be immensely wealthy. Louisa did not dislike him—but how different he was from the George of her late dream. She could never think of him as a husband. However, they became quite friendly. One night as Claude and Louisa were sitting out a dance at Mrs. Somebody's, Louisa began to rally him on his lack of seriousness.

"But I have a very serious nature," he replied. "It is only of late that I have been as you see me. I—I—in fact—am trying to forget."

"That sounds melodramatic," said Louisa. "A love affair, I suppose—one of the hopeless sort?"

"Yes," said he gravely. "Hopeless and strange. All that is left to me now of that blighted romance—forgive me if I seem sentimental—is this picture." And he drew a velvet case from his pocket and handed it to his companion. "I always carry it with me," he said.

Louisa opened it and saw the photograph of her third cousin which she had sent to the lonely New Yorker. "Oh, you are George!" she cried. "George!" gasped Claude.

"Yes," said Louisa, crying softly into her handkerchief. "I'm Eleanor—that's the picture of my third cousin. I sent it to you."

After they had both quieted down a bit there were explanations. He had put the "personal" in the paper on a bet of his companions that he did not dare to do so. After he received Louisa's first letter he sent regularly to the New York post office to get the others, with the result already told. Taking everything into consideration it really did seem as if fate had determined them for one another—and they submitted to fate.

MAYOR'S COURT

Charles Nixon, a drunk and disorderly was placed under arrest Monday evening and was placed in the city prison.

BRIEFLY TOLD

—William Henry Grant, son of Vernon Grant, of Jackson township, is the senior warden of the George G. Wagner Masonic lodge at St. Mary's, Pennsylvania.

FUNERAL OF MRS. BARTLEY.

Funeral services for Mrs. Elizabeth Bartley will be held at the United Brethren church Wednesday morning at 10 o'clock. Rev. S. W. Hiles, officiating. Burial in Forest cemetery.

Missiles for Cannon

In the Middle Ages various missiles were shot from cannon. Bolts are mentioned in 1413, and in 1418 Henry V ordered his clerk of the ordnance to get 7,000 stone shot made at the quarries at Maidstone. Since then chain, grape, and canister have been invented, as well as shells.
